Introduction

Held annually in beautiful Coffs Harbour, the Coffs Waste Conference is widely recognised as the leading waste management event in Australia. With a strong reputation for quality and industry relevance, the conference continues to grow each year.

In 2026, the event attracted over 712 in-person delegates and more than 40 virtual attendees, along with 90 sponsors and exhibitors, and featured presentations from over 120 leading industry experts.

Looking ahead, Waste 2027 will once again bring together national and international thought leaders to share cutting-edge developments, innovative solutions, and practical strategies in solid waste management. The program is being carefully curated to reflect the latest trends, technologies, and policy directions shaping the future of the industry.

The venue

Opal Cove Resort is situated on 14 hectares of beachfront, 7km north of the Coffs Harbour CBD.

The resort offers 4-star accommodation with ocean-view rooms and two to four-bedroom villas. Resort rooms include a hot buffet breakfast; optional for villa stays. Villas are cost-effective, featuring ensuite main bedrooms, full kitchen, laundry, and separate living, dining, and outdoor BBQ areas

Getting there

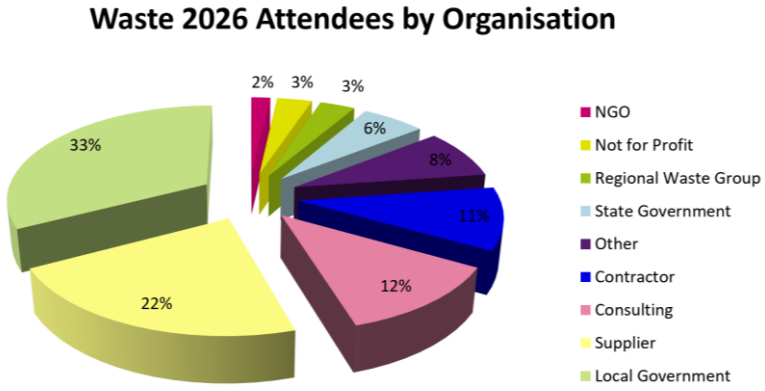

Coffs Harbour is approximately 6 hours drive (554 kms) north of Sydney and 5 hours (427 kms) south of Brisbane. Opal Cove Resort is located on the Pacific Highway less than 10 minutes drive north of Coffs Harbour's town centre. Qantas, Virgin Australia and Rex Airlines all offer flights to Coffs Harbour with trains and coaches also servicing the area. Conference attendees arriving and departing by plane will be offered free scheduled airport transfers at the start and end of the conference.

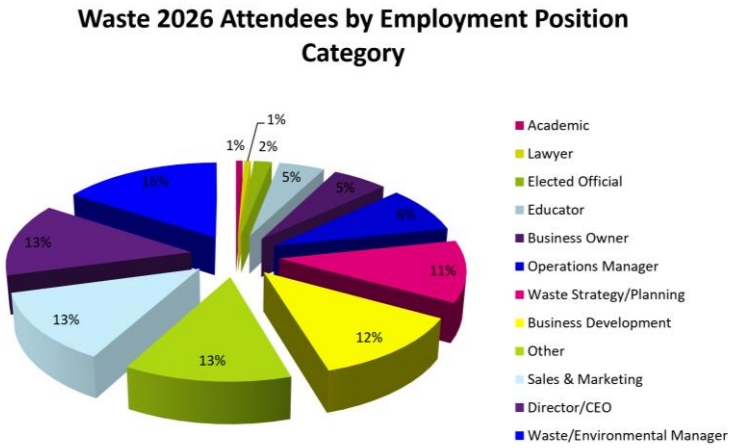

Who will be there?

Delegates attending the conference represent all levels of government (predominantly local government), educators, contractors, suppliers, regional waste management group members, non government organisations and consultants.

The focus of their work is across the board within the waste industry and includes AWT technology, education and promotion, landfill, residential, recycling, organics, hazardous and medical, commercial and industrial and construction and demolition.
