Introduction

Held annually in Coffs Harbour, the Coffs Conference is Australia’s leading waste management conference. The Conference is constantly growing in reputation and in 2024 was run as a hybrid event attracting over 700 onsite delegates, over 50 virtual online delegates, 85 sponsors and exhibitors and over 130 leading industry presenters.

Waste 2025 will feature presentations from international and national leaders and we are developing a program to cover all the latest practical developments and initiatives in solid waste management.

The venue

Opal Cove Resort is situated on 14 hectares of beachfront, 7km north of the Coffs Harbour CBD.

The resort provides great conference facilities and 4 star accommodation including resort rooms, many with ocean views, and two, three and four bedroom villas. Full hot buffet breakfasts are included with resort room accommodation and are optional with villas. The villas are a cost effective option with ensuites to the main bedroom, full kitchen and laundry facilities, and separate lounge, dining and outdoor barbeque areas.

Getting there

Coffs Harbour is approximately 6 hours drive (554 kms) north of Sydney and 5 hours (427 kms) south of Brisbane. Opal Cove Resort is located on the Pacific Highway less than 10 minutes drive north of Coffs Harbour’s town centre. Qantas, Virgin Australia and Rex Airlines all offer flights to Coffs Harbour with trains and coaches also servicing the area. Conference attendees arriving and departing by plane will be offered free scheduled airport transfers at the start and end of the conference.

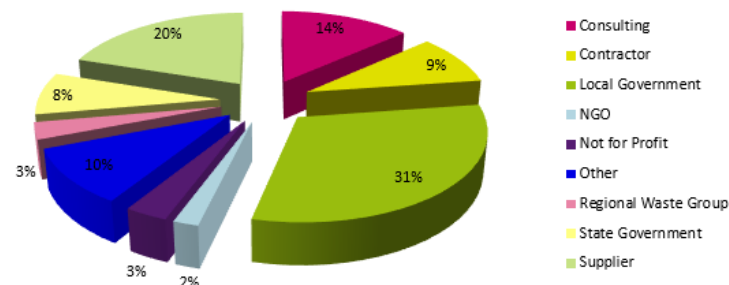

Who will be there?

Delegates attending the conference represent all levels of government (predominantly local government), educators, contractors, suppliers, regional waste management group members, non government organisations and consultants.

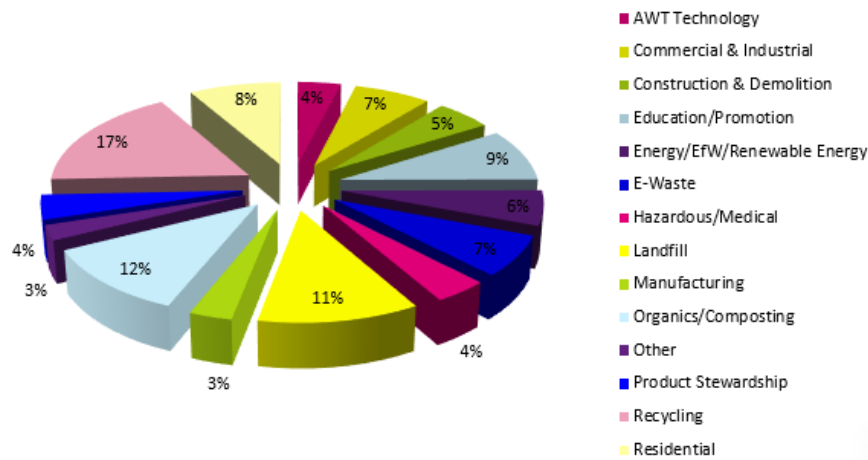

The focus of their work is across the board within the waste industry and includes AWT technology, education and promotion, landfill, residential, recycling, organics, hazardous and medical, commercial and industrial and construction and demolition.
