

One Name... All the Solutions

MASTEC®

The Leading Edge in Waste Management

High Performance 2-Wheel Bins

Designed and manufactured in Australia to withstand harsh Australian conditions, MASTEC® 2-wheel MGB's (Mobile Garbage Bins) have earned an enviable reputation for quality, consistency and robust, long-term performance.

From our compact 80 litre and 120 litre models that share a common lid size and our unique 140 litre 'squat' design, through to the full size 240 litre model and our innovative TRU360 high-capacity 360 litre MGB, there's a MASTEC® 2-wheel MGB to meet your needs.

What's more, as with ALL of the bins in the MASTEC® range, all MASTEC® 2-wheel MGBs are manufactured in Australia and are backed by our 10-year manufacturing warranty, providing you with the confidence of knowing that your bins will keep on performing – year in and year out!

80 litre & 120 litre MGBs

MASTEC® 80 litre and 120 litre MGB's offer the ideal solution for residential waste collection. Available in a wide range of colours, MASTEC® 80 litre and 120 litre bins and lids can also be 'mixed and matched' to suit individual requirements.

Importantly, their unique design also enables the 80 litre and 120 litre bin sizes to share a common size lid, further reducing the cost and complexity of supplying a choice of bin sizes across a single contract area.

140 litre 'squat' MGB

Renowned for its robust high-performance design and stability, the Australian-made MASTEC® 140 litre 'squat' MGB delivers the ideal combination of size and capacity.

Specifically developed to overcome the issues that can be associated with lifting both large and small bins with one vehicle, the MASTEC® 140 litre 'squat' MGB has been designed to help with optimising grab arm settings - enabling one vehicle to collect both large and small bins without any problems.

240 litre MGB

Ideally suited for recyclables, green organics and small commercial waste collections, the Australian-made MASTEC® 240 litre MGB is built to last, with a high quality UV stabilised HDPE construction, heavy duty axle and wheels, and sturdy one-piece handle design.

Performance tested for 'grab lift' side-loaders using the rigorous *PED:TC0010 Bin Lift Cycle Test* developed by Macdonald Johnston Engineering Company Pty Ltd (MJE), the MASTEC® 240 litre MGB delivers robust performance to withstand even the harshest operating conditions.

Accessories

MASTEC® 2-wheel MGBs are also available with a range of optional accessories, including:

- **Rosetted Lids** - to suit bottle and can recycling applications
- **Lockable Bins with Slotted Lids** - ideal for confidential waste
- **Flip Top Lids** - for litter bin applications
- **Lockable Bin Stands** - available in a choice of galvanized or powder coated finish, the key-lockable stand prevents the bin from being stolen or moved
- **Bin Liner Bags** - to suit 80/120/140 litre, 140 litre (squat) and 240 litre bins

Hot Stamping

Mastec also offers a full hot stamping service for bins and lids of all sizes. From logos, names and serial numbers, through to 'hot-stamped' usage and contents guides, Mastec's fully-integrated hot stamping service provides an economical, attractive and permanent alternative to stickers and labels.

MASTEC TRU360

360 litre MGB

Together with its unique **'Positive Grip'** contoured body design, the MASTEC TRU360 incorporates a range of clever design features, including:

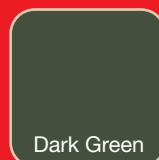

- Strong one-piece handle design
- Honeycomb upper lip design for extra strength
- High performance UV stabilised HPDE construction
- Proven MASTEC lid design
- Two recessed lid handles for easy opening
- Large flat lid surface area for hot stamping business name, logo, usage guide
- Blowhole tab for auto-opening systems
- Horizontal and vertical Chip Nest locations as standard to suit a range of RFID's
- Heavy duty corrosion resistant steel axle
- Utilises standard 240 litre axle
- 300mm solid rubber tyres with plastic injection hub for superior stability and handling
- Rear foot step to assist with tilting and manoeuvring the bin
- Each bin body supplied with unique serial number (including optional 3 digit prefix)
- Bin bodies and lids available in a wide range of colours
- Wide range of accessories and spare parts available
- All bin parts recyclable
- Backed by MASTEC's 10-year manufacturing warranty

Manufactured in Australia to withstand the harsh Australian climate and the toughest operating conditions, the MASTEC TRU360 has been designed to suit domestic and commercial / industrial applications.

Providing a full 360 litre brimful body capacity, the MASTEC TRU360 has been specifically designed to overcome the issues associated with lifting a range of bin sizes with the same vehicle. This has been achieved through the MASTEC TRU360's unique **'Positive Grip'** contoured body design, which allows the collection vehicle's grab arm to 'wrap around' into the contoured sections, thereby maximising contact between the bin and the lifting arm and enabling it to maintain a good grip on the bin during the entire lifting cycle.

Colours

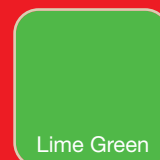

MASTEC® 2-wheel MGBs and 4-wheel bins and lids are available in a range of standard colours and can be 'mixed and matched' to suit your specific needs.

MASTEC® **KO®** BIN

Small Bin... Huge Benefits

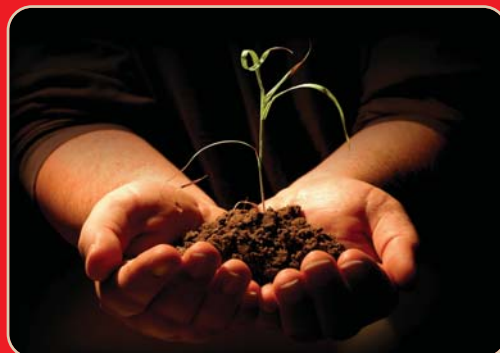

The MASTEC® **KO®** Bin delivers the ideal combination of capacity and compact 'footprint', making it suitable for even the smallest kitchen. Robust yet lightweight, the MASTEC® **KO®** Bin is supplied as standard in an attractive, neutral, 'light bisque' colour, enabling it to blend with the widest possible range of kitchen styles and colours. For maximum convenience, the bin's folding handle can also be used to 'prop' the lid open – which is particularly handy when peeling vegetables or scraping food scraps into the bin from a plate or cutting board.

Designed and manufactured in Australia, the MASTEC® **KO®** Bin provides an attractive, easy-to-use and hygienic solution for separating and diverting Kitchen Organics from landfill:

- **Boosting Recycling Rates**
- **Reducing Waste-to-Landfill**
- **Reducing GHG Emissions**

Compostable Bags

Mastec can also supply rolls of compostable liner bags for the MASTEC® **KO®** Bin. Manufactured from non-GMO origin compostable material, the compostable bags can even be disposed of in home compost units and/or worm farms, and are certified suitable for use in organic farm production, food contact and in animal feed. Designed to deliver the optimum combination of breathability and leak resistance, the compostable bags (including inks and dyes) are certified biodegradable and meet the Australian Standard AS 4736-2006, as well as the relevant European, American and Japanese Standards

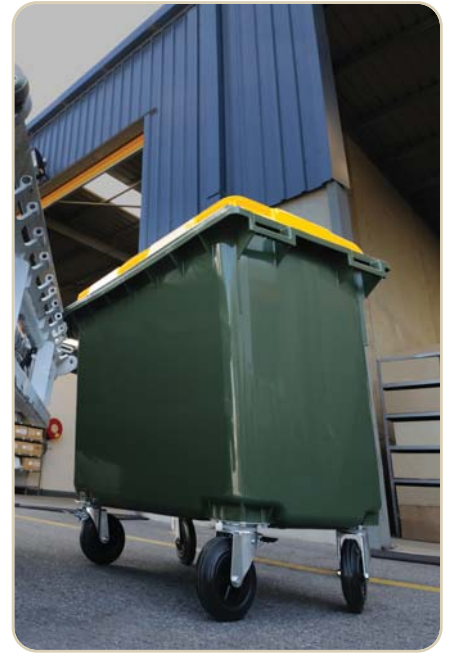

MASTEC AUS660

MASTEC AUS1100

Australian-Made 4-Wheel Bins

Manufactured in Australia, the new MASTEC AUS660 and MASTEC AUS1100 4-wheel bins have been designed with a focus on delivering a quality bin which is robust enough to stand up to harsh Australian conditions.

What's more, the fact that they're made in Australia means that we can offer AUS660 and AUS1100 bins and lids in a full range of Australian Standard colours – quickly and efficiently and without the need for excessive minimum order quantities.

Total Bin Solutions

All MASTEC® 2-wheel MGB's and large capacity 4-wheel bins are available as 'standalone' units, or can be supplied in conjunction with other bins (including the compact MASTEC® KO® Bin and compostable bags) as part of a new or updated collection service. MASTEC® 2-wheel MGB's and 4-wheel bins can be delivered in bulk or delivered to individual households and businesses as part of a contract roll-out – the choice is yours!

Our state-of-the-art bin manufacturing facilities and custom hot-stamping operations, together with our fully-integrated 'high-tech' national bin assembly and distribution service, means that we can tailor a 'Total Bin Solution' to meet your needs. From major metropolitan contracts through to small regional services, we deliver - taking the stress out of bin distribution.

Services Include:

- **Bin Manufacture and Supply**
- **National Assembly & Distribution Services**
- **RFID Supply, Fit and Data Recording**
- **Asset Registration and Database Management**
- **Household Lid Changeover and Divider Removal**
- **Collection & Recycling of Old Bins**
