# SAP TechEd ON TOUR | powered by MASTERING SAP An SAPinsider Company

Track insight:
# SAP Business Technology Platform

Official SAP TechEd on Tour content included

## Automate everything. Operate smarter. Build with confidence.

This track aims to provide end users with grounded insight into how BTP is actually being used, what it's good for, and what to watch out for.

Alongside official SAP TechEd sessions, expect open, real-life perspectives grounded in real-world project experience.

SAP BTP continues to evolve as the foundation for integration, extension, automation, and data management. But for many teams, its full value (and cost) can be hard to assess. This track brings together real-world examples of how organisations are approaching BTP: what they're using it for, how they're managing governance and licensing, and where it fits in their broader SAP roadmap. Whether you're just getting started or looking to improve how BTP supports your architecture, these sessions aim to provide straightforward, experience-based guidance.

**What You'll Learn:**

- Where BTP fits into SAP migration and transformation plans
- How organisations manage BTP architecture, security & costs
- Governance models that support both innovation and control
- Practical use cases for mobile, integration, and extension
- How teams are navigating licensing and usage models
- The role of BTP in hybrid and multi-system environments
- Lessons from early adoption and real implementations
- Clarifying what BTP does - and doesn't - solve

**Topics to be covered:**

- SAP BTP architecture and services
- Cost, licensing, and usage visibility
- Mobile services and identity management
- Governance, security and access control
- Integration with S/4HANA, ECC, and cloud tools
- Low-code and pro-code development environments
- BTP landscape roles and ownership
- Cross-system extension strategies
- Real-world case studies and migration experience

Including: SAP BTP | AI | DevOps | Security | Runtimes | Cloud ALM | Workflow Automation | Integration | Platform Services
