## From Migration to Modernization: Supercharging your Business Transformation

Whether you're preparing for a transition to SAP S/4HANA or building on your existing implementation, true transformation requires more than just a successful migration — it calls for rethinking how your organization manages data, secures systems, and scales operations in the cloud.

This summit is purpose-built for those navigating both stages of the SAP journey: moving to S/4HANA and driving enterprise-wide innovation beyond it.

Dive into sessions that unpack essential topics like data governance, integration frameworks, cybersecurity, infrastructure modernization, and intelligent automation — all grounded in real-world insights, proven strategies, and peer-led conversations to help you lead with clarity and confidence.

### Just getting started on your SAP S/4HANA journey?

#### Uncover

Uncover key issues and challenges, and opportunities

#### Understand

Understand the pathways to migration and tools that are available like BTP, BDC, Signavio and Lean IX

#### Navigate

Navigate decisions about secure cloud deployment including hyperscaler solutions, public cloud solutions, and private cloud

### Already on SAP S/4HANA and looking for true business transformation opportunities?

#### Learn

Learn first-hand how companies are selection what to work on and how to get started

#### Understand

Understand pre-built solutions in BTP and other technologies that drive business transformation

#### Discover

Discover how to adopt AI to enable automation

## SAPinsider Europe Super Summit

### Tuesday 17 June

From 7.30am | Conference Registration

9:00am – 5:00pm | Conference Day One

4:45pm – 5:45pm | Networking Drinks

### Wednesday 18 June

From 8am | Arrival Tea & Coffee

9:00am – 4:00pm | Conference Day Two

## Hilton Vienna Park | Vienna, Austria

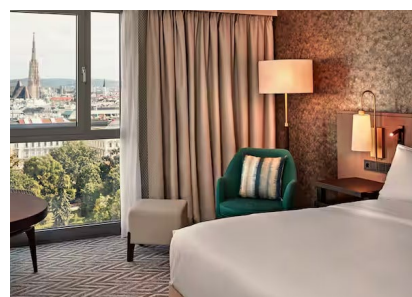

Moments from Vienna's vibrant city center, Hilton Vienna Park is adjacent to the city park, and 16 minutes from the airport, with excellent public transport connections. Walk 12 minutes to St. Stephen's Cathedral or explore the Naschmarkt.

SAPinsider Europe Super Summit 2025 attendees are eligible for a reduced room rate of:

€249 for single occupancy & €279 for double occupancy. [Click to book your accommodation.](#)

All rooms include daily breakfast and basic Wi-Fi.

Room rates are good through 26 May 2025.

## Tuesday 17 June

TRACK: Business Transformation through AI, Integration, and Automation

### SAP BTP Strategy and Highlights

11:40 AM – 12:30 PM | 17 June

**Christian Loos, Product Manager, SAP**

Want to better understand how SAP Business Technology Platform (SAP BTP) can help unleash your business potential? See how SAP BTP brings together application development, automation, data and analytics, integration, and AI capabilities into one unified environment optimized for SAP applications. Get insights on our strategy for SAP BTP and the role of AI. Hear data center updates and explore upcoming innovation highlights.

Attendees will:

- Explore how SAP BTP integrates application development, automation, data, analytics, integration, and AI into a unified environment.
- Gain insights into the SAP BTP strategy and the role of AI in enhancing business potential.
- Review data center updates and upcoming innovation highlights to stay informed about future developments.

TRACK: Business Transformation through AI, Integration, and Automation

### Modernize your Landscape and Automate Business Processes with SAP Integration Suite

1:30 PM – 2:10 PM | 17 June

**Speaker TBC**

Achieve the next level of integration efficiency and process improvement and drive innovation by infusing AI capabilities at scale while supporting them with the rich set of prebuilt content. Learn how the key capabilities of the SAP Integration Suite, including recent innovations and a road map, support scalable, real-time integration of business processes, APIs, and events across SAP and third-party landscapes.

Attendees will:

- Learn how to leverage SAP Integration Suite's capabilities to scale integrations efficiently and accelerate innovation within your enterprise.
- Explore how to connect mission-critical applications and systems across SAP and third-party landscapes to enable smooth, real-time business operations.
- Learn ways to utilize API management and event-based integrations to support dynamic business processes and enhance agility.
- Consider how to stay ahead with the latest advancements and future plans for SAP Integration Suite to optimize your integration strategy.

TRACK: Business Transformation through AI, Integration, and Automation

### Unleash the Power of AI in Enterprise Integrations

2:20 PM – 3:00 PM | 17 June

**Speaker TBC**

Generative AI can unlock innovation, improve efficiencies, and redefine business processes, integrations, automations, and innovations. Learn about the AI strategy for enterprise integrations and how SAP Integration Suite leverages AI to accelerate developer productivity and boost operational excellence.

Attendees will:

- Discover how generative AI can drive innovation and enhance efficiencies in business processes and integrations.
- Learn about SAP Integration Suite's AI strategy.
- Explore how AI technologies are utilized to improve operational excellence within enterprise integrations.

TRACK: Business Transformation through AI, Integration, and Automation

### Transforming Business with SAP Generative AI: A Primer

3:30 PM – 4:15 PM | 17 June

**Anurag Barua, Digital Transformation Leader, SAP**

Generative AI is changing the way SAP's customers work—making processes smarter, faster, and more intuitive. In this session, we'll explore how SAP is integrating generative AI into its solutions to help companies unlock real business value. Whether it's automating repetitive tasks, improving decision-making, or enhancing user experiences, SAP's AI capabilities are designed to drive measurable impact across areas like finance, procurement, HR, and supply chain.

Attendees will:

- Get a deep understanding of the Gen AI enablement framework.
- Learn about the workings of SAP's Gen AI-based digital assistant Joule.
- Get acquainted with Joule use cases that will turbo-charge organizational productivity.
- Get familiar with selected Gen AI capabilities embedded across SAP's cloud solutions portfolio.

## Wednesday 18 June

TRACK: Business Transformation through AI, Integration, and Automation

### Case Study: Technical Debt to Technical Health using SAP BTP at Polestar

11:10 AM – 12:00 PM | 18 June

**Karthik Seshasayee, SAP Solution Architect / Service Owner – ERP Platform, Polestar Performance AB**

Learn how Polestar future-proofed its SAP landscape with a clean core strategy supported by SAP BTP to drive continuous innovation and scalability. Get best practices on setting design guardrails, aligning to SAP's upgrade cadence, and embedding automated testing and validation to simplify upgrades and reduce technical debt—without disrupting operations. Discover how the company modernized its SAP S/4HANA environment, streamlined integration, and enhanced user experience through a stable, flexible architecture. Come away with proven practices to embed resilience, governance, and long-term scalability into your SAP modernization roadmap.

TRACK: Business Transformation through AI, Integration, and Automation

### A Down-to-Earth Review of SAP's AI Offerings

1:00 PM – 1:45 PM | 18 June

**Tamas Szirtes, Group Innovation Director, SOA People**

There is so much hype and marketing around Artificial Intelligence that it's difficult to understand what is possible today and what is only planned for the future. This presentation summarizes what SAP offers regarding AI, reviews the various options, and provides actionable guidance. It unpacks SAP's Business AI vision and critically analyzes the AI Foundation and SAP's AI partnerships. The presentation covers the scenarios in SAP S/4HANA where AI is already embedded, including the new co-pilot called Joule. The purpose of this talk is to separate vision from reality so that customers can make informed decisions about what SAP really offers and what business opportunities are available. This is achieved by assessing the various AI solutions in terms of availability, maturity, prerequisites, and even commercials. Join this session to equip yourself with the right information you need to determine where and how your organization can leverage AI.

Attendees will:

- Get an overview and critical analysis of SAP Business AI.
- Understand availability, maturity, prerequisites and even commercials of the SAP AI offerings.
- Gain insights to determine where and how to leverage AI.

TRACK: Business Transformation through AI, Integration, and Automation

### Lessons Learned Over 50+ SAP BTP Projects

2:00 PM – 2:45 PM | 18 June

**Pieter-Jan Deraedt, CEO, Amista**

Learn lessons learned from projects to enhance your success with SAP BTP. Pieter-Jan has been actively engaged in over 50+ projects on SAP BTP over the past decade. Gain valuable knowledge and practical advice that can positively impact your endeavors with SAP BTP.

Attendees will:

- Learn the do's and don'ts of SAP BTP.
- Understand SAP BTP Governance.
- Hear SAP BTP Architecture advice.

TRACK: Business Transformation through AI, Integration, and Automation

### What's on Your Mind – AI, Integration, and Automation

3:15 PM – 4:00 PM | 18 June

**Speaker TBC**

What's On Your Mind? is a dynamic discussion that aims to address the diverse and evolving concerns surrounding architecture and integration, including SAP BTP, Cloud, scalability, clean core, SAP Integration Suite, and other topics. Expert moderators will facilitate the discussion, but your questions, comments, and insights will drive the group discussion. By allowing the conversation to be steered by the attendees, the discussion will cater to the specific interests and needs of the participants, making it a highly personalized and informative experience. Join us to explore the critical aspects of Architecture and Integration in today's rapidly changing dynamic technology landscape.

*More Sessions Coming Soon...*

## Tuesday 17 June

TRACK: SAP S/4HANA & Cloud Migration

### Make the Case, Plan the Path: Building a Business Case and Project Plan for SAP S/4HANA

10:45 AM – 11:30 AM | 17 June

**Torsten Bech Andersson, Management Consultant, Implement Consulting Group**

This session offers a strategic and actionable roadmap to justify and execute your SAP S/4HANA transformation. Learn how to build a compelling, data-backed business case using tools like SAP TRAC, Pathfinder, and Business Scenario Recommendations to assess system readiness, quantify value, and uncover performance and usability improvements that resonate with both executive and technical stakeholders. Get tips to identify ROI opportunities, avoid common pitfalls, and prioritize essential pre-project tasks—like data archiving and custom code remediation—to set the stage for a successful migration. Come away with the frameworks to bridge business strategy and IT execution, helping you position your project as a driver of measurable enterprise value from day one.

TRACK: SAP S/4HANA & Cloud Migration

### Charting the Right Course: SAP S/4HANA Deployment Models, Scenarios & Strategy

11:40 AM – 12:30 PM | 17 June

**Kurt Hollis, Manager, SAP Specialist Master, SAP Cloud Engineering, Deloitte**

Before diving into technical upgrades or executing on your migration plans, it's essential to take a step back and evaluate the strategic decisions that shape your SAP S/4HANA journey.

Attend this session to:

- Explore key differences between SAP S/4HANA deployment models and understand how your choice impacts long-term scalability, integration, and total cost of ownership.
- Evaluate transition scenarios (Greenfield, Brownfield, Selective Migration) and the pros and cons of each based on system readiness, business priorities, and technical complexity.
- Identify key pre-migration questions, including custom code strategy, third-party compatibility, and data retention policies.
- Align your SAP S/4HANA strategy with business transformation goals.

TRACK: SAP S/4HANA & Cloud Migration

### Deep Dive: Designing the Backbone: SAP S/4HANA Architecture, Integration & Cloud Readiness

1:30 PM – 3:00 PM | 17 June

**Kurt Hollis, Manager, SAP Specialist Master, SAP Cloud Engineering, Deloitte**

Once you've chosen your migration strategy, the next step is designing a technical architecture that supports performance, agility, and innovation.

Attendees will:

- Understand SAP S/4HANA architecture requirements, including differences based on cloud, hybrid, and on-premise deployments.
- Explore the role of SAP BTP, SAP SAC, and SAP Datasphere.
- Learn how to size your systems using Quick Sizer, memory estimations, and T-shirt sizing.
- Prepare for secure, scalable operation through SSO, role management, and data archiving strategies.
- Get expert guidance around extensibility, hyperscalers, and cloud provider selection.
- Explore options for leveraging Fiori and rapid content activation for a smooth user experience.

TRACK: SAP S/4HANA & Cloud Migration

### What's on Your Mind – SAP S/4HANA and Cloud Migration

4:25 PM – 5:00 PM | 17 June

**Speaker TBC**

Bring your most pressing questions—and your toughest challenges—to this interactive session where you —attendees— drive the conversation. Designed as an open, informal discussion, this is your chance to engage directly with SAP experts, industry leaders, and fellow SAP customers on the S/4HANA topics that matter most to you. Alongside expert guidance, you'll gain insights from your peers who are navigating similar journeys, offering fresh perspectives and lessons learned. Every question shapes the conversation, making this a highly relevant and personalized learning experience.

## Wednesday 18 June

TRACK: SAP S/4HANA & Cloud Migration

### The Journey to SAP Business Suite with RISE & GROW

9:00 AM – 9:45 AM | 18 June

**Anurag Barua, Digital Transformation Leader, SAP**

As business models rapidly evolve and technology changes accelerate, enterprises such as yours are striving to enable the former by fully utilizing the latter. SAP's capabilities and offerings allow your enterprise can run in an efficient, agile, scalable, intelligent, secure, and sustainable manner. RISE with SAP and GROW with SAP are the two frameworks SAP provides to simplify and accelerate customer's journey to the cloud and thus enable them to run in an efficient, agile, scalable, intelligent, secure, and sustainable manner. Attend this session to obtain a comprehensive understanding of RISE and GROW.

Attendees will:

- Learn about the drivers for RISE and GROW.
- Discover in a deep dive of RISE about its components & benefits.
- Delve into GROW including its components & benefits.
- Hear from selected RISE & GROW customer success stories.

TRACK: SAP S/4HANA & Cloud Migration

### The Journey to Clean Core

10:15 AM – 11:00 AM | 18 June

**Henrik Secher Jarlskov, CTO, Gavdi Labs**

SAP keeps talking Clean Core, but most companies do not really see any realistic possibility of getting anywhere near a Clean Core scenario for their SAP systems. Instead of writing off the concept of Clean Core as something that cannot be done this session aims to position a path forward - a way to get started and incorporate Clean Core as a way of delivery. This is a topic that has been treated much in black and white and in many aspects in absolutes. This session turns that discussion on its head and investigates the underlying challenges and its potential business value creation and impact. A central part of the session is an honest insight into why this is an issue for so many SAP customers and why companies keeps failing at getting this off the ground. Start to take ownership of your custom development and with it managing the risks and execution prowess of your critical SAP business systems. Get started on a path that will potentially lead to massive savings in upgrades and life cycle management of your custom code - together with a greatly improved TCO on your SAP business systems.

Attendees will:

- Learn how we get so messy with our critical business systems.
- Recognize the outcome and impact of investing in a Clean Core.
- Understand where you are and how to take the first steps towards a Clean Core.
- Get to a higher pier with your custom development.
- Manage the constant decay of custom code.

TRACK: SAP S/4HANA & Cloud Migration

### Case Study: From Architecture to Adoption: Inside Merck's SAP S/4HANA with RISE Journey

11:10 AM – 12:00 PM | 18 June

**Salvatore LoBosco, Head of Merck Life Science ERP CoE, Merck**

This session offers actionable insights from Merck's SAP S/4HANA with RISE initiative, including how they balanced infrastructure decisions with business priorities to build a clean, scalable ERP foundation. Gain insight into infrastructure and architectural decisions—from environment sizing and provisioning to global connectivity—and how they impacted user experience and long-term agility. Get lessons in managing downtime, provisioning, and integration complexity and come away with strategies for aligning ERP infrastructure with business transformation goals.

## Wednesday 18 June

TRACK: SAP S/4HANA & Cloud Migration

### Case Study: How OMV Moved Fragmented Systems into the SAP S/4HANA Private Cloud: Tips on Scoping, Sizing, Testing, and More

1:00 PM – 1:45 PM | 18 June

**Daniel Preiser, Senior Expert SAP Cyber Security Architecture & SIEM, OMV**

This session explores how OMV scoped and sized its SAP S/4HANA Private Cloud environment, defined its transformation roadmap, and restructured its system architecture to support scalability and performance. Learn how the team ensured business continuity through rigorous testing, streamlined master data governance, and improved reporting with unified data models. Come away with field-tested strategies for executing a large-scale ERP migration without compromising system stability or future agility.

TRACK: SAP S/4HANA & Cloud Migration

### Turning Strategy into Action: Executing Your SAP S/4HANA Migration

2:00 PM – 2:45 PM | 18 June

**Kurt Hollis, Manager, SAP Specialist Master, SAP Cloud Engineering, Deloitte**

Once you've selected your deployment approach and designed the architecture—now it's time to execute. This session examines the step-by-step process of performing a system conversion, implementation, or selective migration to SAP S/4HANA.

Attendees will come away with actionable guidance to:

- Use SAP Readiness Check and simplification item analysis to prepare your system.
- Leverage SUM, CVI, the Migration Cockpit, and custom code tools.
- Manage dual landscapes during conversion and create execution runbooks for each environment.
- Plan your go-live with proven cutover and testing strategies.
- Navigate complexities such as custom code remediation, third-party add-on compatibility, and data migration validation.

TRACK: SAP S/4HANA & Cloud Migration

### Customer Panel: Three Paths to SAP S/4HANA: A Comparative Look at Deployment Models in Practice

3:15 PM – 4:00 PM | 18 June

**Speaker TBC**

Migrating from SAP ECC to SAP S/4HANA presents a range of strategic decisions—none more critical than selecting the right deployment approach. In this customer panel, three SAP customers share how they navigated this complex terrain, each choosing a different path: Greenfield, Brownfield, and the Selective Data Transition approach. Panelists will walk through the business case behind their decisions, the technical and organizational criteria they evaluated, and how their chosen strategy aligned with their transformation goals. Whether you're preparing your roadmap or reevaluating your approach, this session offers real-world guidance to help you make informed decisions.

*More Sessions Coming Soon...*

## Tuesday 17 June

TRACK: Data & Analytics

### Data Mesh, Data Fabric, and a Holistic Architecture Approach with SAP Datasphere

10:45 AM – 11:30 AM | 17 June

**Dirk Morgenroth, Senior Consultant Analytics, Phoron Consulting GmbH**

The session illustrates the principles underlying the Data Mesh approach and shows how a modern cloud-based data landscape can succeed in conjunction with the Data Fabric in the specific use case of SAP Datasphere. It is based on the practical implementation of such an architecture variant.

Attendees will:

- Learn the principles of Data Mesh: Domain-oriented ownership, Data-as-a-product, Self-serve data platform and Federated computational governance.
- Understand how the Data Fabric architectural approach can work together with Data Mesh.
- Gain an overview of which components of these two approaches can be implemented with SAP Datasphere.

TRACK: Data & Analytics

### SAP's New Data and Analytics Solution: Enabling a New Data Economy

11:40 AM – 12:30 PM | 17 June

**Speaker TBC**

The future of data management and AI requires an integrated approach that unifies all your data and systems. See how a business data fabric, enabled by the SAP's Business Data Cloud, simplifies data landscapes and empowers organizations to access insights wherever their data resides.

TRACK: Data & Analytics

### Deep Dive: Effective Data Governance through Enhanced Master Data, Data Quality, and Data Cataloging

1:30 PM – 3:00 PM | 17 June

**Speaker TBC**

In an era where data is the backbone of decision making, organizations must prioritize data governance to harness the full potential of their data assets. To rapidly innovate and accelerate AI use, organizations must ensure they have high-quality, context-aware, reliable data to stay ahead. This deep dive session will equip you with the essential skills and knowledge to enhance master data, data quality and data catalog capabilities. By integrating these elements, organizations can establish a solid foundation for effective data governance.

By the end of this workshop, you will be able to:

- Ensure a data strategy drives business outcomes.
- Understand how you can drive confidence and trust in data.
- Understand the principles and importance of master data, quality, observability and cataloging in the context of data governance.
- Learn how to identify common data quality issues as well as techniques for remediation and continuous monitoring.
- Explore effective data and AI governance practices to enhance data discoverability, access, and security.

TRACK: Data & Analytics

### What's on Your Mind? Data & Analytics

4:25 PM – 5:00 PM | 17 June

**Speaker TBC**

What's On Your Mind? is a dynamic discussion that aims to address the diverse and evolving concerns surrounding data strategy, data readiness for AI, data governance for AI, Business Data Cloud, and other topics. Expert moderators will facilitate the discussion, but your questions, comments, and insights will drive the group discussion. By allowing the conversation to be steered by the the group, the discussions will cater to the specific interests and needs of the participants, making it a highly personalized and informative experience. Join us to explore the critical aspects of data management and leadership in today's AI-driven landscape.

## Wednesday 18 June

TRACK: Data & Analytics

### Case Study: LoB Agility and Efficiency: The Role of SAP Analytics Cloud and SAP Datasphere At Vestas Wind Systems A/S 9:00 AM – 9:45 AM | 18 June

**Manisha Palli, Specialist Data and Performance,  
Vestas Wind Systems A/S**

This session shares with you how SAP Datasphere and SAC empower LoBs with data-driven insights at Vestas Wind Systems. We'll discuss strategies for enhancing LoB agility and implementing effective data governance in matrix organizations as we have in our department. We'll dive into use cases on how we integrate SAP and non-SAP data into Datasphere and consume it in SAC, and in some cases consume SAP Datasphere into Power BI.

Attendees will:

- See how you can empower LoBs with the data-driven insights they need.
- Understand effective Data Governance in Matrix Organizations.
- Hear business use cases on Integration of SAP and Non-SAP Data in SAP Datasphere.
- Understand bi-directional consumption of data between SAP Datasphere/SAC and consuming DS data into Power BI.

TRACK: Data & Analytics

### Consumer AI for Analytics? Benefiting from LLMs Beyond the Vendor Tools in Daily Professional Use 10:15 AM – 11:00 AM | 18 June

**Dirk Morgenroth, Senior Consultant Analytics, Phoron  
Consulting GmbH**

While vendors in our industry like SAP are driving the development of advanced AI-based functionalities in their tools, numerous mature Large Language Model based services (LLM) such as ChatGPT and Claude.AI are already publicly available to consumers. The session will highlight numerous opportunities and risks associated with the use of this technology. Specific use cases for the SAP Analytics community will be highlighted and illustrated with practical examples, and prompt engineering techniques will be taught.

Attendees will:

- Understand the benefits of large language models in the context of development of SAP Analytics scenarios.
- Gain an overview of the most important state of the art consumer LLMs and their strengths and weaknesses.
- Explore how those tools may support the end-to-end process from requirements engineering to ideation, design and implementation of state-of-the-art SAP Analytics solutions.
- Get an introduction to the most important prompt engineering techniques and examples for the analytics domain.

TRACK: Data & Analytics

### Case Study: Lessons and Outcomes from Geberit's SAP BTP and SAC Journey 11:10 AM – 12:00 PM | 18 June

**Speaker TBC**

See how Geberit turned early SAP BTP pilots into a unified, enterprise-grade platform that drives real-time analytics, marketing automation, and seamless integration across business systems. Discover how the team overhauled its BI landscape by deploying SAP Analytics Cloud and SAP Data Intelligence Cloud to deliver smarter insights across marketing, CRM, and planning.

Get practical takeaways from what succeeded—and what didn't—as Geberit explores next steps with SAP Datasphere for BW modernization, taps into ABAP Cloud for extensibility, and activates SAP Build Work Zone to enhance the user experience. Whether you're in the early phases of your BTP journey or scaling existing investments, this session will equip you with actionable strategies, architectural insights, and lessons learned to guide your SAP transformation roadmap.

## Wednesday 18 June

TRACK: Data & Analytics

*More Sessions Coming Soon...*

### Case Study: Journey to a Simplified Data Landscape using SAP's Business Data Cloud

1:00 PM – 1:45 PM | 18 June

#### ***Speaker TBC***

In this session, a key Customer tells of their journey to simplifying their Data Landscape using SAP's new integrated Data and Analytics Solution. See how this journey has enabled them to develop a future-ready and data-focused mindset and harness the power of AI to discover insights and accelerate decision making.

## Tuesday 17 June

TRACK: Security & Governance

### Case Study: Securing SAP Systems with Franke Group

10:45 AM – 11:30 AM | 17 June

**Victor Andreu, Chief Information Security Officer, Franke Group**

SAP systems are the backbone of many enterprises, essential for smooth operations and strategic decision-making. However, growing cyber threats such as ransomware, compliance risks, and the complexity of interconnected environments pose significant challenges for security teams. In this session, Franke Group's CISO will share firsthand why Cybersecurity for SAP became a strategic priority. Get a behind-the-scenes look at their implementation journey, the challenges they addressed, and the tangible benefits realized. Join this session to gain practical insights into securing your SAP landscape and making cybersecurity an enabler for business success.

Attendees will learn how to:

- Secure a comprehensive landscape with vulnerability management and threat detection and response
- Conduct effective application security testing within SAP environments
- Navigate challenges from initial strategy through implementation and usage
- Explain and justify the costs of cybersecurity investments to key stakeholders

TRACK: Security & Governance

### SAP Security Monitoring and Response: Tools for Securing Applications

11:40 AM – 12:30 PM | 17 June

**Vincent Doux, CSA for oCFO, SAP**

One of the biggest challenges from a cybersecurity perspective is detecting and identifying threats. In this session you will learn about effective security monitoring techniques and incident response strategies for SAP systems. We will discuss real-world examples and case studies to highlight the importance of proactive security measures. We will also explore a comprehensive set of cutting-edge techniques and strategies essential for safeguarding SAP systems. The focus will be on imparting actionable insights into effective security monitoring, ensuring that participants gain a profound understanding of the intricacies involved in securing SAP environments.

Attendees will:

- Delve into the nuanced realm of incident response, providing attendees with a strategic toolkit to navigate and mitigate potential security threats efficiently.
- Hear real-world examples and case studies, bringing these concepts to life, and illustrating their practical application in diverse scenarios.
- Gain not only theoretical knowledge but also practical skills that can be directly applied to enhance the security posture of SAP systems within their organizations.

TRACK: Security & Governance

### Deep Dive: The SAP Security Game

1:30 PM – 3:00 PM | 17 June

**Gabriele Fiata, Global Head of Cybersecurity Market Strategy, SAP**

Are you ready to elevate your SAP security expertise? Join us for an immersive and interactive SAP Security Game, crafted to simulate real-world security challenges faced by organizations. Participants will navigate various scenarios designed not only to test but also to enhance their strategic and technical expertise in SAP security. This active session offers an invaluable opportunity to enhance your skills in security planning, compliance management, and breach response while promoting collaboration and learning in a supportive and competitive setting. Throughout the workshop, we will engage with three critical topics including preventative security control implementation, compliance request/audit handling, and security breach response.

Attendees will:

- Learn to develop and implement robust security controls to safeguard your SAP environment.
- Gain experience in efficiently managing and responding to compliance requests and audits with precision.
- Practice responding swiftly and decisively to a simulated security breach, aiming to minimize damage and ensure business continuity.

## Tuesday 17 June

TRACK: Security & Governance

### Case Study: Security and Compliance for SAP S/4HANA Cloud with Bayer

3:30 PM – 4:15 PM | 17 June

**Asha Vartak, Director, Cyber Security and Risk Management, Bayer**

Discover how Bayer has reimagined its approach to securing Cloud ERP systems while navigating complex regulatory requirements. This session highlights their transformative journey, showcasing critical milestones in strengthening cloud security, overcoming compliance challenges, and setting a course for future advancements.

Explore Bayer's collaboration with SAP Enterprise Cloud Services, focusing on proactive risk management and innovative security solutions. Whether you're already utilizing Cloud ERP or considering a transition, this session provides fresh perspectives and actionable strategies for maintaining security and regulatory excellence in a dynamic cloud landscape.

Attendees will:

- Learn how Bayer transformed cloud security for ERP systems while meeting complex regulatory standards.
- Discover key milestones in overcoming compliance challenges and implementing proactive risk management.
- Explore Bayer's collaboration with SAP to drive innovative security solutions for future advancements.

TRACK: Security & Governance

### What's on Your Mind - Security & Governance

4:25 PM – 5:00 PM | 17 June

**Speaker TBC**

In this interactive session, you set the agenda. Join SAP security specialists, industry experts, and fellow attendees for a candid, wide-ranging discussion on topics, from zero trust, access management, and data protection to the security risks that come with cloud adoption and SAP S/4HANA migrations. You'll hear how your peers are tackling similar challenges and walk away with real-world solutions you can put into action immediately. No slide decks—just honest conversation, real questions, and expert insights.

## Wednesday 18 June

TRACK: Security & Governance

### Case Study: Lessons from the Field: Data and Security Wins from Perfetti Van Melle's SAP S/4HANA Migration

10:15 AM – 11:00 AM | 18 June

**Marcelo Monsores, SAP Security/GRC Team Lead, Perfetti Van Melle**

This session offers a firsthand look at how Perfetti Van Melle used its global SAP S/4HANA migration as a springboard for enhancing data integrity and security. Hear how the company embedded role review, SoD risk mitigation, and GRC automation into its strategy—shifting from reactive controls to a proactive, integrated approach. Get tips for addressing data quality challenges through effective master data management, and how this ensures the new environment supports accurate, reliable operations. Come away with actionable insights and next steps to fortify your data and security foundations ahead of your own SAP S/4HANA journey.

*More Sessions Coming Soon...*

TRACK: Security & Governance

### Mastering Cloud Operations & Security: Insights and Best Practices

2:00 PM – 2:45 PM | 18 June

**Gabriele Fiata, Global Head of Cybersecurity Market Strategy, SAP**

Transitioning to the cloud simplifies system maintenance but raises security concerns. This session explores SAP S/4HANA cloud and general SAP cloud security best practices, covering data protection, access management, compliance, and incident response. We will address common customer questions to build trust and provide actionable insights for robust security and compliance in SAP's cloud environment. Join us to enhance your cloud security expertise.

Attendees will:

- Understand the fundamentals of cloud security, including encryption, access management, compliance, and incident response.
- Explore specific security features and best practices for SAP S/4HANA.
- Gain insights into how SAP ensures product security and addresses common customer concerns in the cloud.
