SAP TechEd ON TOUR | powered by MASTERING SAP — An SAPinsider Company

Track insight:
Digital Transformation & Cloud ERP

Official SAP TechEd on Tour content included

Modernise faster. Extend smarter. Run clean.

Join this track for straightforward guidance and examples from peers who are actively working through SAP ERP transformation. Whether you're moving now or planning ahead, the focus is on helping you make informed, sustainable decisions based on practical experience.

In addition, the official SAP TechEd strategic and roadmap sessions will help guide future planning while the hands-on sessions let you experience how to use the technologies & solutions.

Many organisations are working through what digital transformation really means in their SAP environment - whether that's preparing for the 2027 deadline, exploring RISE or GROW, or simply making better use of their current ERP. This track shares practical insights from teams who are navigating the shift to S/4HANA Cloud, managing hybrid landscapes, and balancing business needs with technical decisions. Sessions are designed to support IT and functional teams with planning, architecture, data, governance and adoption - grounded in experience, not theory.

What You'll Learn:

- Migration experiences from ECC to public or private cloud S/4HANA
- Key differences between RISE, GROW, and on-premise strategies
- How organisations are planning their roadmap, budgets and business alignment
- What functionality is available out-of-the-box in S/4HANA Cloud
- Common architectural and integration decisions, including the role of BTP
- Governance, resourcing, and team structures that support transformation
- How data quality and archiving are being tackled during projects
- Ways to extract more value from your current ECC environment in the meantime

Topics to be covered:

- S/4HANA migration planning and options
- RISE with SAP and GROW with SAP
- Cloud ERP architecture and extensibility
- Data readiness and historical data management
- ERP change management and adoption
- Aligning ERP strategy with functional priorities
- Role of SAP BTP in transformation projects
- Integration with existing SAP and third-party systems
- Resourcing, support and ongoing operations
- Lessons learned from completed and in-progress migrations
- Hybrid models and interim approaches
- ECC value optimisation while deferring migration

Including: SAP S/4HANA Cloud | SAP BTP | RISE with SAP | Clean Core | ERP Migration | Cloud Architecture | AI in ERP | Integration | Personalisation | Hybrid Deployment

EXHIBITION CENTRE, ICC SYDNEY 12 - 14 NOVEMBER 2025
