

SUITABLE FOR

TRI-SOLFEN® For Lambs

Topical anaesthetic and antiseptic solution for pain relief in lambs

A local anaesthetic and antiseptic spray for pain relief on lambs following tail docking and during or following surgical castration.

KEY FEATURES

Active Ingredients:

- Lignocaine 40.6g/L (as hydrochloride)
- Bupivacaine 4.2g/L (as hydrochloride)
- Adrenaline 24.8mg/L (as acid tartrate)
- Cetrimide 5.0g/L

Benefits

- Designed for practical application to achieve rapid onset and extended pain relief
- Spray application that acts as protective barrier over the wound
- Adjustable spray nozzle applicator
- Quick and easy to use
- 4-in-1 wound care product
 - › Both fast and longer acting pain relief
 - › Reduction in post-operative bleeding
 - › Reduces wound healing time
 - › Reducing inflammation and long-term pain.

WHEN TO USE

- Apply Tri-Solfen® to the wound immediately after tail docking. Ensure that the wound area is evenly covered with spray, particularly wound edges. Do not spray to run-off
- Use of the Tri-Solfen® applicator is recommended
- Minimise risk of infection by maintaining clean hygienic practices for equipment and facilities
- Insecticidal preparations can be applied to the wound after application of Tri-Solfen® to prevent fly strike
- As far as possible, avoid treatment of animals during wet weather or under dusty conditions
- Users must comply with New Zealand animal welfare legislation at all times when undertaking surgical or painful procedures involving animals
