trūRapid Series

Rapid Detection In-house

...with accurate results in 10 minutes.

The Heska trūRapid line offers veterinary professionals an ease and breadth of testing, which includes as many as 8 common companion animal infectious diseases – all returning results in around 10 minutes. With the additional advantages of room temperature storage and long shelf-life, Heska trūRapid tests are versatile, reliable, and cost-effective.

Utilise multiplexed options like trūRapid FIV/FelV and trūRapid Parvo/Giardia/Coronavirus for more speed and flexibility!
