

Digital Poster Guidelines

Thank you for contributing a digital poster to the 2026 ALLA Conference. These guidelines are designed to help you create an engaging, accessible, and visually effective poster for online display.

This is a wonderful opportunity to highlight your knowledge, share innovative projects, and express your creativity within the vibrant community of law librarianship and legal research.

As for poster design, let your creativity take the lead! Whether you're a fan of classic design techniques or want to try out AI tools, feel free to experiment, just remember to mention any AI involvement in your pitch.

Please ensure your poster has a clear message, is succinct and self-explanatory; you can address specific details with viewers in discussion with them.

For complex and detailed projects, a QR code may be useful in providing a link to further information or a video recording about the poster. A QR code can help you share the story behind the work and describe how it provides opportunity for the industry.
