CUSHIONING TECH – SUPER CRITICAL FOAMS*

DNA TUNED ☉ Nitrogen-infused foam with dual-size cell technology. Larger cells in the heel provide plush landings, while smaller cells in the forefoot invite responsive toe-offs.

DNA LOFT Our soft and durable cushioning. DNA LOFT v2 is a lighter version of DNA LOFT. DNA LOFT v3 is nitrogen infused for a lighter, softer, bouncier midsole.

DNA FLASH DNA infused with nitrogen, for incredibly lightweight, responsive cushioning. DNA FLASH v2 is a softer, lighter and bouncier midsole.

DNA Long lasting, environmentally friendly midsole cushioning that dynamically adapts to your biomechanics.

DNA GOLD 100% PEBA cushioning is the lightest, softest, and highest energy return foam Brooks has ever made.

*All of our Nitrogen infused foams are supercritical foams

SUPPORT TECH

GUIDERAILS Innovative, holistic support technology that guides the body into its natural motion path of least resistance.

Extended PDRB: (Progressive Diagonal Roll Bar) Tri-density post at the medial arch allowing for progressive support that guides the body into its natural motion path of least resistance.

GlideRoll Rocker: Curved geometry of the midsole that actively assists the transition from heel to toe for increased protection.

RapidRoll Rocker: Utilisation of plated technology to provide a faster transition from contact to toe off

UPPER TECH

3D Fit Print: Advanced screen printing process to apply structure to the upper for a seamless, supportive fit.

Engineered Mesh: Custom design, strategically woven mesh to provide structure and breathability.

GORE-TEX®: Waterproof, breathable lining.

Increased Sustainability: Utilising dope dying and 100% recycled polyester.
