

# For the relief of mild osteoarthritis symptoms

# epijoint®

Proudly Australian owned, Epijoint® is a new, unique nutraceutical product created to help your patients better manage their mild osteoarthritis symptoms.

Epijoint® soft gel capsules contain **Epiitalis®**, a world-exclusive, plant seed oil extract which has undergone rigorous clinical assessment in the setting of osteoarthritis to test its safety and efficacy across a variety of species including humans. Epiitalis® is also globally patented for both its anti-inflammatory effects and joint cartilage cell health benefits (chondrocyte proliferation).

## Nutritional Information

| Active Ingredients                                 | mg/capsule |
|--|------------|
| Biota orientalis fixed seed oil (Epiitalis®)       | 80         |
| d-alpha-tocopherol (equivalent to 20 IU Vitamin E) | 13.42      |
| Excipients   | mg/capsule |
| Olive Oil  | 353.73     |
| Softgel Capsule                                    | mg/capsule |
| Purified water                                     |            |
| Glycerol   | 78.14      |
| Gelatine   | 146.38     |
| Chlorophyllin copper complex                       | 0.73       |
| Titanium dioxide                                   | 0.8        |
| Total  | mg/capsule |
| Total Fat  | 409.3      |
| Total Omega -3                                     | 37.2       |
| Total Omega -6                                     | 47.8       |
| Polyunsaturated fats                               | 88.3       |
| Av. fill weight                                    | 452        |

Available in 60 and 120 soft capsules

Nut Free

Dairy Free

Marine Free

Gluten Free

### Dosage

Take 2 capsules, once daily with food

### Warning

Always read the label, and follow the directions for use. Contains soy and sulfites. If pregnant or breastfeeding, consult your healthcare professional before taking Epijoint®

# Why you would recommend Epiitalis®

- ◆ Patented nutraceutical
- ◆ Cost-effective, oral daily dosing
- ◆ No known contraindications
- ◆ Evidence based, clinically researched
- ◆ Clinical efficacy increases with time\*
- ◆ Demonstrated safe and effective control of osteoarthritis symptoms\*
- ◆ Safety results - no SAEs, no IP-related AEs, no changes in safety measures outside of the normal limits\*
- ◆ Symptomatic efficacy similar to, or improved vs. that historically reported for NSAIDs/COX-2 inhibitors\*

## Recent human clinical trial results

Examining the effects of a daily dose of Epiitalis® on reducing symptoms of Xray-diagnosed KL-II and KL-III knee osteoarthritis. 235 patients, mean baseline VAS-pain score 77.5/100.\*
