

Angelo Benn

As a **designer, maker, and mentor**, I bring over a decade of expertise as a laser technician and designer. My passion lies in fostering creativity and equipping others with the tools to excel.

Why Train with Me?

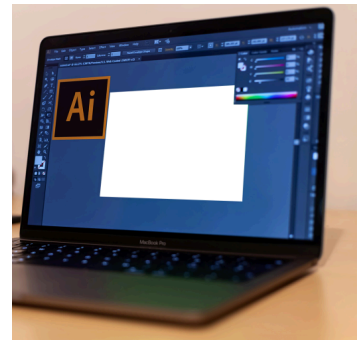

Extensive experience in **laser cutting, engraving, and design workflows, including 3D printing and CNC technologies.**

A proven track record of training **hundreds of teachers** over the past decade.

Practical, real-world insights from my studio's daily use of laser machines and 3D printers.

A focus on empowering participants to **take charge of their creative journey** confidently and clearly.

As a trained and experienced maker regularly using the laser to create simple and complex projects, I understand the 'why' and 'how' behind laser machines. My goal is to ensure you walk away with the knowledge and skills to succeed.

Saturday 8 March

Design and Drawing using Adobe

Using Template with Illustrator – for schools – practical session – participants must have Adobe Illustrator on their laptops with a mouse. – NO ADOBE EXPRESS

Tips and Tricks on how to use a laser cutter to process fabrics.
