# POS WORKS

## Retail pharmacy software that works.

Gain real-time insight and control over every aspect of your pharmacy business to elevate performance, efficiency and profit.

POS Works is customisable to suit and integrate into virtually any type of retail pharmacy business, while seamlessly integrating with Dispense Works for a complete pharmacy solution.

### RealSync engine

RealSync is POS Works' own proprietary real-time data synchronisation engine. RealSync enables all of your retail pharmacies, online stores, warehouses, and head office, to be connected and informed with current and accurate data. Data transfer is robust, highly secure and almost instantaneous.

### Customised solution

We believe software should be tailored to suit the way your business operates. POS Works is customised for every client, right down to individual store-level bespoke customisation.

### Seamless integration

Utilising our highly experienced development team, POS Works integrates with Dispense Works and a wide range of other service providers to ensure a seamless solution for your business.

### Australian support

POS Works is an Australian owned and operated company. Our support centre is based in Brisbane, and our network of support technicians around the country are ready to keep your business running smoothly 365 days a year.

## Retail pharmacy software that works

Gain real-time insight and control over every aspect of your retail pharmacy business to elevate performance, efficiency and profit. POS Works is customisable to suit and integrate into virtually any type of retail pharmacy business, while seamlessly integrating with Dispense Works for a complete pharmacy solution.

RealSync is POS Works' own proprietary real-time data synchronisation engine. RealSync enables all of your retail pharmacies, online stores, warehouses, and head office, to be connected and informed with current and accurate data. Data transfer is robust, highly secure and almost instantaneous.

## Additional POS Works functionality

### Take your retail pharmacies online

Unlock the power of your bricks and mortar pharmacy business by simultaneously trading online—allowing you to offer click and collect, display real-time stock on hand, and easily manage thousands of prices.

### Simple and secure payment systems

A simple and secure payment system is essential for retail pharmacy businesses of all sizes. Take advantage of BPay and direct debit integrations, providing secure transactions and customer convenience.

### Wireless technology provides flexibility and efficiency

POS Works translates onto a select range of wireless devices—such as tablets or smartphones—which may be used for various in-store processes, plus allows owners and manages remote monitoring of sales and KPIs.

### Hardware and IT solutions for pharmacies

Take the hassle and expense out of sourcing and maintaining hardware and IT for your pharmacy network, plus POS Work's Australian support technicians are available 365 days a year to keep your entire business running smoothly.
