Workshop Summary

The FSEP Full program runs for 7 hours and provides a solid foundation of information for all clinicians involved in antenatal and intrapartum care. The full day program is structured to cumulatively build understanding. Participants in the full day program also complete the FSEP MCQ assessment at the end of the session. This is our core education program and is suited to most clinicians requiring education or an update in cardiotocography.

Program Outline

- The utero-placental unit, fetal heart rate control and basic fetal assessment
- The normal CTG, who to monitor and an introduction to the abnormal CTG
- The abnormal CTG, focusing on decelerations, interpretation and management
- CTG Workshop and Discussion
- Course Evaluation and 60 MCQ assessment

Pre-Reading Material

The pre-reading material for this workshop may be obtained via the FSEP website:
