Workshop Summary

This full day practical hands-on workshop focusses on the techniques and management of first and third trimester ultrasound scanning.

Program Outline

1. First Trimester Pregnancy: Transabdominal and Transvaginal Approach and Measurement
2. First Trimester Pregnancy: Normal Development and Viability
3. Biometry
4. Third Trimester Pregnancy: Assessment
5. Documenting your Scans

The practical training includes:

Hands-On Practical Session 1: The Ultrasound Machine

Hands-On Practical Session 2: First Trimester Measurement and Assessment using the Transabdominal/Transvaginal Approach

Hands-On Practical Session 3: Third Trimester Measurement and Assessment

Learning objectives:

- To understand the technical aspects of generating an optimal ultrasound image.
- To understand normal ultrasound features of first and third trimester pregnancies.
- To develop scanning skills for first and third trimester of pregnancy.
- To develop documentation and reporting skills.
