Workshop Summary

This is a theoretical and practical 'hands on' workshop aimed at developing clinical skills in the repair of third- and fourth-degree perineal tears using porcine anal sphincters.

Prevention and management of subsequent pregnancy will also be discussed.

Program Outline

- Welcome and introduction
- Anatomy of anorectum
- Prevention and diagnosis of obstetric anal sphincter injury (OASI) – national and international care bundles
- Episiotomy – when, how?
- Primary surgical management of OASI – video and practical session
- Follow up and next pregnancy
