Dear	
I have discussed with you the possibly your recent operation.	ility that you experienced an allergic drug reaction associated with
the interests of your safety, I have a attempt to determine the agent which doctors who care for you in the futu- weeks after your procedure to allo information regarding anaphylaxis pl	ance (or allergen) to which you reacted without further testing. In referred you for specialist assessment and testing. The aim is to h caused the reaction and guide alternative treatment provided by the interest in most cases skin testing is not performed until a number of low your body to fully recover from your reaction. For more ease refer to the brochure entitled "Anaesthetic Allergy: A Patient e not already received this leaflet you can obtain one from
Until skin testing occurs you must informed and plan your further me anaesthetist should you need further s	carry this letter with you to allow doctors caring for you to be anagement. This information will be particularly helpful to your surgery prior to testing.
Prior to your reaction the following d	rugs and skin preparations were used:
contacted within 6 weeks please conta	testing clinic to arrange your skin testing. If you have not been act me on the number above. <i>Please take this letter with you to the</i>
testing appointment.	Print or stamp anaesthetist/hospital contact details
Yours sincerely,
