

Enjoy **fast and efficient practice management** software with all the core features you need, enhanced by the benefits that flow from working in the cloud.

We work directly with specialists to design and develop our features so they provide efficient workflows with fewer clicks. Use Gentu® while working from the clinic, your home, in theatre or on the go, using the Gentu Mobile App. We have been working with specialists for almost 30 years to create software solutions that make a true difference.

**Process patient
documentation faster**

**Spend more quality
time with patients**

**Streamline processes
with intuitive features**

Intuitive practice management software tailored for specialists

Enhance the efficiency of your practice and streamline patient care via these benefits and more:

- Gentu® is true cloud software, running entirely on the cloud from your browser or app wherever you may be.
- The Gentu® Mobile App helps clinicians stay organised and informed on the go, while the Marketplace offers a one-stop app integration experience that streamlines routine tasks.
- Collaborating and co-designing with specialists for almost three decades means we understand what you need from your software.
- Gentu® follows best practices on patient privacy and security, with data stored securely in Australian data centres.
- All our support staff are located in Australia and provide support via live chat, email and phone.
- We offer on-site training at city centres across Australia, as well as remote and group training.
