JGHFoundation - APDWF Marshall-Warren Luminal Gastroenterology Lectureship

• INTRODUCTION

In 2007 the Journal of Gastroenterology and Hepatology Foundation (JGHFoundation) introduced a distinguished lecture in the area of luminal gastroenterology. The lecture was to be delivered each year during Asia Pacific Digestive Week. From 2008 onwards this lecture is to be known as the JGHFoundation Marshall-Warren Lecture to recognize the pivotal contribution to luminal gastroenterology made by Professor Barry Marshall and Professor Robin Warren, both from Western Australia. Professors Marshall and Warren received the Nobel Prize in Medicine in 2005 for their discovery of the principal causal agent of peptic ulcer disease and of a major aetiological factor in gastric cancer – the bacterium *Helicobacter Pylori*. Their discovery has changed the landscape for the management of peptic ulcer disease throughout the world.

• SELECTION PROCESS

The Selection Process is as follows:

- The APDW Local Organizing Committee (LOC) nominates three (3) potential lecturers and appropriate topics for each nominee.
- The potential nominees should come from more than one country within Asia Pacific region and should not have previously received the lectureship at a preceding APDW Congress.
- The APDWF Board shall review the nominations before submitting them to the JGHFoundation to make final selection of the lecturer in the year preceding the lecture.
- The APDWF will inform LOC of the results who will in turn notify the selected lecturer.

• FUNDING

JGHFoundation will provide a funding package to cover the following expenses;

- Return airfares economy for national sector and business class for international sector (or two economy class airfares for the full trip to equivalent cost) between home city and the venue for the APDW meeting.
- Accommodation for the duration of APDW.
- Honorarium of USD 2,000 for submission of manuscript at the time of the meeting for publication in the Journal of Gastroenterology and Hepatology (JGH).
- All travel and accommodation arrangements will be made by the APDW organizers.
- The selected Lecturer must ensure that both a manuscript and all relevant receipts are provided to the APDW organizers to receive reimbursement and payment.

• MANUSCRIPT

The Lecturer is required to submit a manuscript at the time of the meeting that will cover the content of his/her lecture. The manuscript should be structured as a review article between 3,000-5,000 words and between 3-8 tables and figures. It is expected that this will be a detailed and learned exposé of the topic concerned, and will also emphasize practical points for clinicians and investigators. For information on JGH style guidelines please see the [Wiley-Blackwell House Style Guide](#).

- PAST AWARD RECIPIENTS

Year	Recipient	City	Topic
2023	Yoshio Yamaoka	Oita	Revolution of H. pylori Treatment
2022	Zhao-shen Li	Shanghai	Development of ERCP technology in China for the last 3 decades
2021	Peter Gibson	Sydney	Diet as a Therapeutic Tool in Chronic Gastrointestinal Disease – Not all Plain Sailing
2019	Uday C Ghoshal	Lucknow	A paradigm shift in understanding the pathophysiological basis of irritable bowel syndrome and implication on its treatment
2018	Nayoung Kim	Seoul	Chemoprevention of Gastric Cancer by H. pylori Eradication and its Underlying Mechanism
2017	Khean Lee Goh	Kuala Lumpur	Lessons learnt from the Epidemiology of H. pylori Infection in a multi-racial Asian Population in Malaysia
2016	Tsutomu Chiba	Kyoto	Mechanism for H. pylori-induced genetic instability in gastric cancer development
2015	Jaw-Town Lin	Taipei	Chemoprevention of Gastric Cancer by H. pylori Eradication and long-term use of NSAIDs and aspirin
2014	Nageshwar Reddy	Hyderabad	Chronic pancreatitis – endoscopic therapy
2013	Mamoru Watabade	Tokyo	Adult tissue stem cell therapy for gastrointestinal diseases
2012	Kentaro Sugano	Tochigi	Premalignant conditions of gastric cancer
2011	F K L Chan	Hong Kong	Managing Ulcer Risk in patients receiving Antiplatelet Therapy
2010	Neville Yeomans	Melbourne	Aspirin: Old drug, new uses and challenges?
2009	Joseph JY Sung	Hong Kong	Peptic Ulcer Bleeding: an Expedition of Two Decades in Asia
2008	Barry Marshall	Perth	

JGHFoundation -/ APDWF Okuda State-of-the-Art Lectureship

• INTRODUCTION

Professor Kunio Okuda was one of the pioneers of hepatology and a great supporter of gastroenterology and the study of liver disease in the Asia Pacific region. In the course of a career that flourished for more than 50 years since publishing his first paper he made an extraordinary number of contributions to the field. He published many books and innumerable articles and reviews. He also trained and influenced two generations of liver specialists from throughout the Asia Pacific region as well as from his native Japan.

Among his accomplishments – which included receiving many Japanese and international distinctions, prizes and awards – he was perhaps most proud of having been a co-founder of the Asian Pacific Association for the Study of the Liver (APASL). He was also an inaugural Editor of the Journal of Gastroenterology (Editor-in-Chief until the time of his death in February 2003) and a founding Trustee of the JGHFoundation. With his permission the JGH State-of-the-Art Lecture was renamed the JGHFoundation Okuda Lecture in September 2002.

• SELECTION PROCESS

The Selection Process is as follows:

- The APDW Local Organizing Committee (LOC) nominates three (3) potential lecturers and appropriate topics for each nominee.
- The potential nominees should come from more than one country within Asia Pacific region and should not have previously received the lectureship at a preceding APDW Congress.
- The APDWF Board shall review the nominations before submitting them to the JGHFoundation to make final selection of the lecturer in the year preceding the lecture.
- The APDWF will inform LOC of the results who will in turn notify the selected lecturer.

• FUNDING

JGHFoundation will provide a funding package to cover the following expenses;

- Return airfares economy for national sector and business class for international sector (or two economy class airfares for the full trip to equivalent cost) between home city and the venue for the APDW meeting.
- Accommodation for the duration of APDW.
- Honorarium of USD 2,000 for submission of manuscript at the time of the meeting for publication in the Journal of Gastroenterology and Hepatology (JGH).
- All travel and accommodation arrangements will be made by the APDW organizers.
- The selected Lecturer must ensure that both a manuscript and all relevant receipts are provided to the APDW organisers to receive reimbursement and payment.

• MANUSCRIPT

The Lecturer is required to submit a manuscript at the time of the meeting that will cover the content of his/her lecture. The manuscript should be structured as a review article between 3,000-5,000 words and between 3-8 tables and figures. It is expected that this will be a detailed and learned exposé of the topic concerned, and will also emphasise practical points for clinicians and investigators. For information on JGH style guidelines please see the [Wiley-Blackwell House Style Guide](#).

- PAST AWARD RECIPIENTS

Year	Recipient	City	Topic
2023	Pei Jer Chen	Taipei	Hepatitis B: What remains to be solved
2022	Ji-Dong Jia	Beijing	Novel Diagnosis and Therapy for Autoimmune Liver Diseases
2021	Kazuichi Okazaki	Osaka	Current Perspectives on IgG4-Related Disease in Hepato-Gastroenterology
2019	Tooru Shimosegawa	Sendai	Clinical features and diagnosis of early-stage pancreatic cancer
2018	Henry Chan	Hong Kong	Challenges of Hepatitis B in the Era of Antiviral Therapy
2017	Ching Lung Lai	Hong Kong	Chronic Hepatitis B: HBsAg seroclearance, cccDNA and Treatment under Trial
2016	John Windsor	Auckland	Novel strategies for treating severe acute pancreatitis
2015	Edward Gane	Auckland	Advances in HCV Therapy- Towards a Global HCV Elimination
2014	Stephen Locarnini	Melbourne	New Therapeutic Targets Against Hepatitis B Virus: The Need for Molecular and Immune Based Treatments
2013	Fusheng Wang	Beijing	Immune disorders lead to liver damage and influence antiviral efficacy in patients with chronic HBV infection
2012	Jia-Horng Kao	Taipei	Risk stratification for HBV-related HCC
2011	Masashi Mizokami	Chiba	Optimizing Treatment for Chronic Hepatitis C – incorporating molecular medicine into clinical practice
2010	Anna Suk-Fong Lok	Michigan	Does antiviral therapy for hep B & C prevent HCC?
2009	Ding-Shinn Chen	Taipei	Towards Elimination and Eradication of Hepatitis B
2008	Masashi Mizokami	Nagoya	Management of hepatocellular carcinoma; From surveillance to molecular targeted therapy.
2006	Malcon Alison	London	Stem Cell Therapy in Liver Diseases
2005	Sung-GyuLee	Seoul	Asian Contribution to living donor liver transplantation
2004	Daiming Fan	Xi'an	A bird's-eye view on gastric cancer research of the past 25 years
2003	Shiu Kum Lam	Hong Kong	The role of cyclo-oxygenase (COX) in GI Diseases
2002	Yun-Fan Liaw	Taipei	Hepatitis flares and HBeAg seroconversion: Implications in anti-HBV
