UNIVERUS

Assets and Field Management Technology

Budget Allocation

See the most effective way to allocate budget so your assets perform optimally

Resource Efficiency

Improve efficiency, reduce operating costs and increase service delivery

Data Insights

Know whether to repair or replace, and the best time to take action

Configure

Fully configurable long-term solution with online/offline capabilities

Integrate

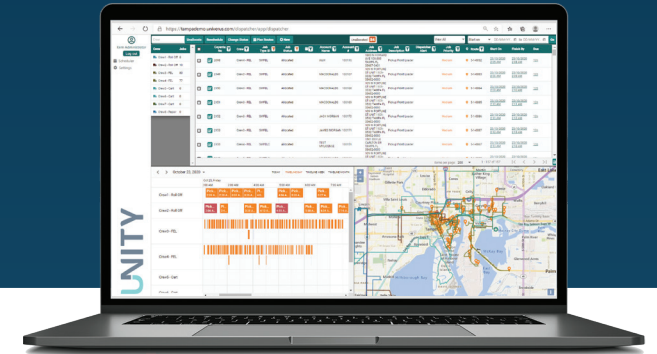

Seamless two-way data integration with in-house or cloud based systems provides real-time updates

Dispatch

Full dashboard view empowers dispatchers to balance workloads and respond to high priority jobs faster than ever.

Univerus Field

Univerus Field delivers an intuitive dashboard with features like GIS Mapping, Crew Calendar, and Dispatch tools that can assign crews to worksites in the most efficient manner while also managing the job as it progresses.
