

Communication solutions for advanced safety and performance

CSE's communications and security division, CSE Crosscom is driving success for customers by keeping teams safe, improving performance and maintaining critical operations through innovative communication solutions.

With a reputation of serviceability and scale, our team of integrators, engineers and project managers have the expertise to deliver highly specialised, end-to-end solutions for an expanding range of industries, including mining, utilities, industrial, transport, retail, public safety and construction.

CSE Crosscom has the flexibility to cater for small and large projects, and short or long-term hire, tailoring innovative solutions to meet the unique requirements of each project.

Leading Technologies for Complete Solutions

CSE Crosscom integrates world leading technology, equipment and infrastructure to keep you connected at all times. With decades of experience and innovation in communication solutions, we can achieve interoperability across platforms and integrate broader technologies to meet your site demands.

TWO-WAY RADIO

From UHF radios to TETRA and P25 digital systems, we keep you connected with secure, reliable and efficient communications. From mine site radio infrastructure to concert and live event communications, our radio hire and sales services can be scaled to suit any project.

PUSH TO TALK

Connect your team with greater efficiency with a push to talk over cellular service for communications without boundaries. Get the speed and simplicity of professional radio PTT communication with the ability to share details via text, photo, video or file attachment.

LTE NETWORK

Merging the capabilities of a smart phone with the durability and reliability of a push-to-talk device across 4G LTE and Wi-Fi network configurations, LTE is purpose-built and designed to maximise connectivity in business and mission critical environments.

LINKING AND BACKHAUL

Reliably and efficiently connect your sites with Microwave and Point-to-Point systems. Maintain critical communications and operations with reliable backhaul capabilities and a robust and scalable connection.

COMMUNICATION INFRASTRUCTURE

We build and deploy bespoke Trailers, Huts and Towers for both relocatable and fixed infrastructure. Designed to withstand harsh environments, CSE Crosscom's solutions provide advanced coverage to keep communication paths open for unrivalled performance.

Local support when you need it most

Comprehensive lifetime service and technical support for all our technologies through dedicated in-house technicians.

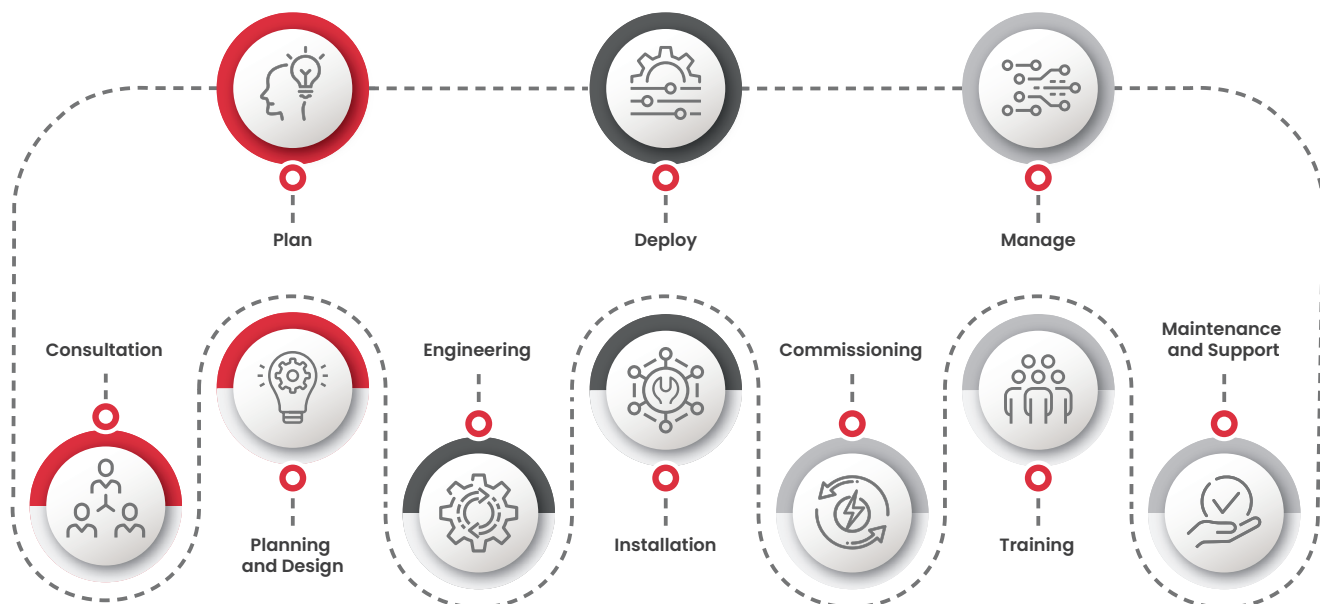

Our services span on-site audits, testing, commissioning, maintenance and repairs to keep your systems operating at their optimum.

Integrated communication solutions tailored to your requirements

With expertise in safety, connectivity, risk management, asset monitoring and systems architecture, our solutions go beyond traditional capabilities. Our solutions transform operations and empower your people with greater ease, efficiency and safety by providing site wide connectivity and data intelligence.

Designing industry-leading communication solutions takes more than just technology. CSE Crosscom takes a comprehensive approach to systems engineering, operating under the highest standards of engineering and quality management to understand requirements and overcome complex challenges.

CSE's division, CSE Crosscom is a leading communication and security solution innovator, delivering capable connected solutions to keep you connected at all times.

Specialising in the design, integration, management and supply of solutions, CSE Crosscom supports an expanding range of industries including mining, utilities, industrial, transport, retail and construction.
