	<p>Inter-disciplinary care is a commonly used phrase as it relates to endometriosis, but what does it mean? Differing terminology and the variation from ‘multidisciplinary care’ result in confusion and inequities. Importantly, we have emphasised the value of interdisciplinary care in endometriosis but do not understand the impact of this on outcomes for patients or the capacity to deliver this model. Furthermore, geographic variations, access to different disciplines, and cost of health make standardisation complex.</p> <p>The WCE2025 interdisciplinary panel will examine these factors from a local to a global level. It will delve into what our current understanding is of endometriosis care and how we need to approach care from patient, clinical, and provider perspectives. We have sought stakeholders from across the globe to have input into evidence and practice and how they would make interdisciplinary care an integral part of endometriosis.</p> <p><b>Dr Budi Wiweko</b>, University of Indonesia, Indonesia  <b>Ms Deborah Bush</b>, World Endometriosis Organisation, New Zealand  <b>Dr Leesa Van Niekerk</b>, University of Tasmania, Australia  <b>Dr Idalhiz Flores</b>, Ponce Health Sciences University, Puerto Rico  <b>Dr Sharmin Abbasi</b>, Anwer Khan Modern Medical College Hospital, Bangladesh</p>
