

WCE 2025 Pre-Congress Workshop Program: Surgical Management of Deeply Invasive Endometriosis: Evidence and Techniques for Optimised Outcomes: Laparoscopic or Robotic Assisted Surgical Approaches

Sponsored by Device Technologies

*As at 16 May 2025
Subject to change without notice*

- Three focused sessions will address the surgical principles vital for managing both pelvic and extra-pelvic deep infiltrating endometriosis.
- In the fourth session, Dr Danny Chou will perform robotic-assisted laparoscopic surgery live: Laparoscopic Reverse Submucosal Dissection, commonly referred to as "Sydney Shaving," targeting a rectal endometriotic nodule.
