BLIND ASSEMBLY

Ensuring Precision Day In, Day Out.

When it comes to manufacturing blinds, precision is paramount. Our comprehensive range of Specialty Double-Sided Tapes and associated products provide this assurance. Whether it be for attaching, bonding, laminating or hemming, we can help you find the right solution to meet your needs. Our in-house slitting facilities allow us to provide a customised product and exceptional value for our customers.

Double-Sided Specialty Tapes

TESA® 886 SERIES DOUBLE-SIDED TISSUE TAPE

Offering two variants the tesa 886 series has you covered. The 886 range is ideal for laminating rough or hard to adhere to surfaces. It is resistant to weathering, UV and ageing, allowing it to be used in both indoor and outdoor blinds. The modified tackified acrylic adhesive system, together with high coating weight, offers excellent initial tack and adhesion levels on hard to adhere to surfaces.

Applications: Ideal for core starting, spline lamination and hemming of blind fabrics which are rough in texture or have surface protection making them more difficult to adhere to.

TESA® 51970 DOUBLE-SIDED POLYPROPYLENE TAPE

Polypropylene backing with an adhesive system designed for use on a wide range of surfaces. tesa® 51970 is widely used in roller blind assembly applications due to its unique adhesive system and its ability to adhere to certain fabrics such as mesh, where surface area is reduced, as well as on coatings which make adhesion difficult.

Applications: Ideal for bonding various fabrics to metallic or PVC profiles in roller blind applications.

Double-Sided Filmic Tapes

TESA® 51966 DOUBLE-SIDED POLYESTER TAPE

Economy grade double-sided polyester tape designed to meet outdoor requirements. The polyester backing and acrylic adhesive system offers high UV stability and allows short term temperature resistance up to 130°C.

Applications: Suitable for bonding various fabrics to metallic or PVC profiles in roller blind applications.

TESA® 4965 NEXT GEN. DOUBLE-SIDED POLYESTER TAPE

Premium grade polyester tape offers ultimate performance in blind assembly applications. The polyester backing and modified acrylic adhesive system offer high UV stability, as well as high temperature resistance up to 200°C short term. The high-performance tape shows excellent performance in demanding industrial, permanent and outdoor applications.

Sustainable Aspects:

- tesa® 4965 Original Next Gen with - 40% CO₂ emissions
- Biomass balanced tackified acrylic adhesive
- 90% PCR PET in the backing

Applications: Ideal for bonding various fabrics to metallic or PVC profiles in roller blind applications, particularly where high holding power and outdoor suitability are required.

General Purpose Masking Tape

TESA® 53123 GENERAL PURPOSE MASKING TAPE

Slightly creped paper backing with a natural rubber adhesive.

Applications: Suitable for many general purpose applications involving tabbing, Marking, bundling, light carton sealing and blind fabric alignment.

Flat Spline & Round Spline

Specifically developed for roller blind manufacturers. Our spline is designed to withstand the rigours of high and low temperatures over a long period of time. ABS plastic provides high rigidity and excellent insulating properties making it ideal for laminating to fabrics in base rails.

Available in a variety of widths, lengths and thicknesses – we can also provide pre-taped with many of the adhesives listed above (one side or two), as well as plain as required.

Stock sizes available: 9mm, 10mm and 15mm wide

THE FINISHING TOUCH

We pride ourselves on tailoring a packaging solution to suit our customers' needs, helping them to improve processes and consequently save time and money. Ensuring your products are protected from the beginning of the journey until the end.

Laylat Tubing

Ideal for protecting products during transportation. Plastic layflat tubing is available in a range of sizes from 50mm through to 1 meter wide. Australian manufactured in a variety of thicknesses to suit your requirements.

- Print your company logo or a message.
- Sustainable Planet-friendly variant available.

Cardboard Packaging

Shipping your products far and wide? Whether its local, rural or interstate. Cartons are great way to protect your blinds during transit. We supply Cardboard in a range of styles, sizes & board grades.

All manufactured here in Australia to suit your specific design requirements. Samples available by request. Custom printing also available.

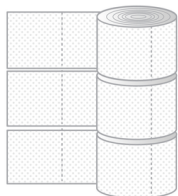

Protective Packaging

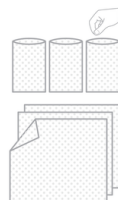

Each business has unique needs. We offer a range of protective packaging options. Available in a variety of widths and thicknesses. For easier handling, your rolls can be slit or perforated on the roll to suit your application. All manufactured in Australia

Full Rolls

Slit or Perforated Rolls

Bags & Loose Sheets
