

The image features five rolls of solar fabric standing upright against a white wall. From left to right, the rolls are: a solid orange roll, a white roll with horizontal stripes in orange, blue, and red, a solid yellow roll, a solid green roll, and a solid red roll. The background shows a bright blue sky and a sandy beach with the ocean in the distance, viewed through a window or opening. The text 'Goodearl x Bailey' is positioned in the upper right, and 'Performance + Design Solar Fabrics' is in the lower right.

Performance + Design
Solar Fabrics

Dickson Orchestra is woven from 100% solution-dyed Sunacryl acrylic. The colour is locked into the very core of the fibres during manufacture ensuring exceptionally long-lasting, ultra-vivid colour hues. With the added protection of Cleanguard®, this coating ensures optimal water resistance and prevents dirt build-up over time.

Dickson INFINITY truly revolutionises broad span-awnings with its exclusive 'resilient' system technology to control the elongation of the fabric over time, allowing you to create seamless 'wide span' awnings for the ultimate clean-lined aesthetics.

Dickson MAX takes outdoor fabric to the next level with its innovative permaclean finish. This unique treatment contains nano-particles that form a dense protective layer on the fabric, effectively repelling dirt and keeping it on the fabric's surface. A simple rinse or rain shower is all it takes to keep your fabric looking clean and fresh.

- + Contemporary colours that last
- + Mould and mildew resistant
- + Water resistant
- + UV & heat protection
- + 10 year warranty
- + Easy to clean
- + Protecting you and the planet

Dickson Solar Fabrics

Designed to perform

Dickson Solar Fabrics are designed to meet a complete range of outdoor needs. Utilising the finest manufacturing processes, technology and materials, Dickson's innovative Orchestra Fabric Collections adapt to any space.

Outdoor living at its finest

Discover the perfect balance of style and functionality with our range of solar protection fabrics, designed to enhance your outdoor space and provide shade and comfort for the ultimate outdoor living experience.

Energy efficiency

Our fabrics are meticulously engineered to shield against harmful UV rays and significantly reduce solar heat gain. This not only keeps your home cooler and more comfortable, but also decreases dependence on air conditioning. By opting for our solar protection solutions, you can transform your home into a more energy-efficient space and save on energy bills.

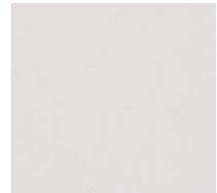

Fabric innovation

Experience the cutting-edge technology and craftsmanship behind our solar protection fabrics. With advanced high-performance fibres, treatments, weaving procedures and innovative designs, they offer unparalleled performance, durability, and easy maintenance.

Stone Collection

A complete range of grey shades.
Grey is a neutral base and does not affect the natural colour of light.

Dickson INFINITY revolutionises broad-span awnings with an extra wide 3.2 metre span. Its unique high-resistance weave allows for a seamless awning.

INFINITY fabrics are woven from 100% solution-dyed Sunacryl High Tenacity acrylic fibre and colour dyed to ensure long-lasting, ultra-vivid colours.

Finished with Cleangard®, this process creates a genuine water barrier and prevents dirt building up.

Dickson MAX takes outdoor fabric to the next level with its innovative permaclean finish that forms a dense protective layer, effectively repelling dirt and keeping it on the fabric's surface. A simple rinse or rain shower is all it takes to keep your fabric looking clean and fresh.

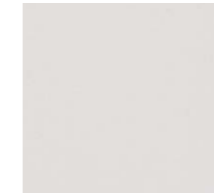

MAX is coated on the underside with an anti-fungal, UV-resistant acrylic resin to enhance its powerful water-resistant properties. The acrylic fibres not only maintain vibrant colours over time but also offer protection against harmful UV rays.

MAX is particularly suitable for permanent installations that are exposed to weather variations and pollution, such as retailers, hotels, and restaurants. It is also considered a cutting-edge residential solution.

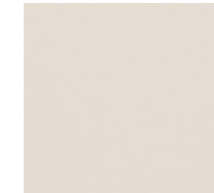

Dickson MAX

"Embrace the elements"
The Ultimate All-Weather Protection Fabric to enjoy your outdoor space.
