

AERONAUT

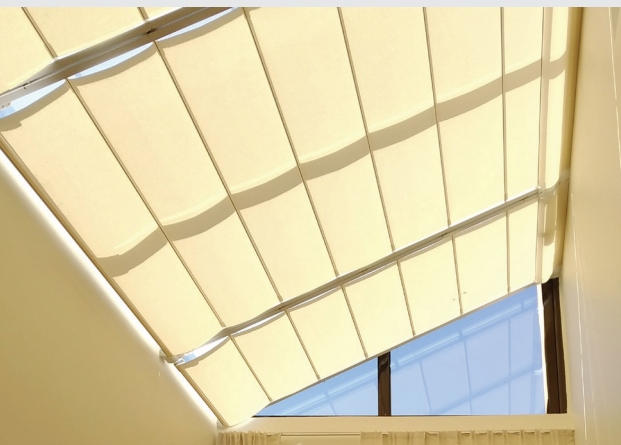

Window Furnishings

Blade, Laser, Ultrasonic & Crush Cut

Complete cutting systems for shade products and window furnishings

with software for rapid pattern development and automated cutters which mark, crease cut and edge-seal. Aeronaut systems give productivity increases of up to 400% compared with conventional cutting methods with improved product quality, reduced mistakes and reduced waste.

Designed to handle every production requirement

Aeronaut's cutters are fast, accurate, hard-working and reliable. They're designed with rational engineering concepts to give an economical, high performance machine with a very long service life needing only minimal maintenance.

Quick-change bayonet mount tooling

means the cutter can be reconfigured in seconds to give un-matched versatility with ultrasonic, crush cut, drag blade, rotary blade and creasing tools available.

Software controlled by Tangent, Aeronaut's in-house developed machine control and advanced auto-nesting software.

Available in a wide range of sizes up to 6 metres wide and 50 meters long. Aeronaut builds machinery to fit your factory. Vacuum tables can also be extended at any time after installation.

ParaSol: Made for Shade

Indoor & outdoor shade design software

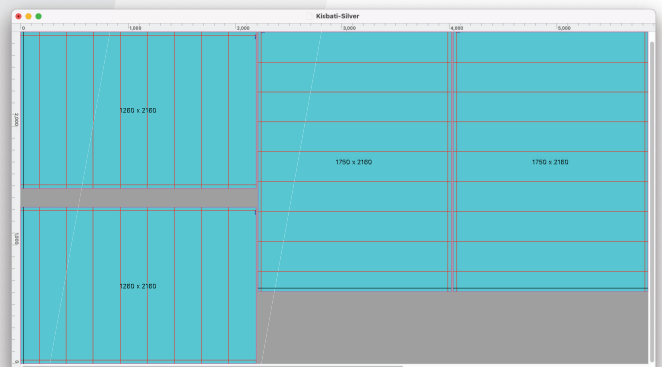

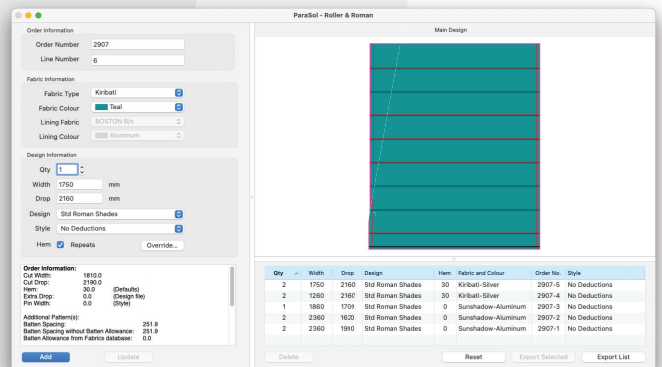

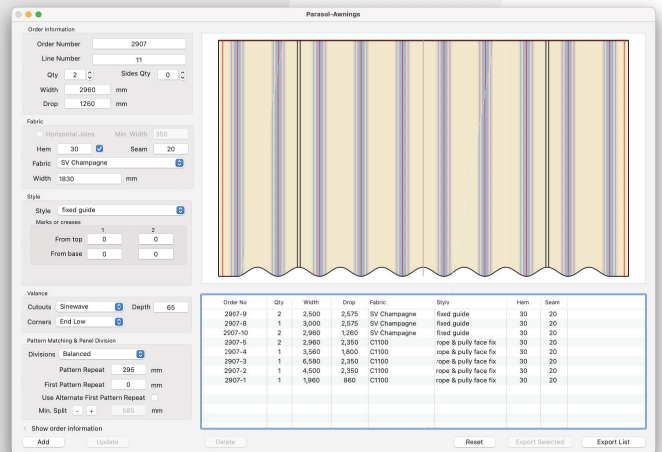

Design with confidence knowing it will be produced the way you want. Thanks to its parametric approach, ParaSol can rapidly design the full gamut of shade patterns and allow your unique designs to be programmed in.

A room full of roman blinds can be designed in a few seconds with an aesthetically pleasing batten lineup across all windows and doors irrespective of their height using ParaSol's comprehensive and user friendly overrides.

Flexibility to suit your business ParaSol is at home at a cutting station as it is in the office. Whether you have an operator following a job sheet or an automated order system ParaSol can seamlessly fit into your current workflow or become the centre of a new one.

Modern Interface written to take advantage of the latest technologies and interface developments, making the design and production process as fast and as simple as possible.

Two decades of experience starting with Aeronaut's Aeroblinds and AeroAwnings software we've had the opportunity to work with leading blindmakers around the world to deliver the window furnishing industry's fastest, most powerful, best featured and most user friendly design and production software.
