

About Us

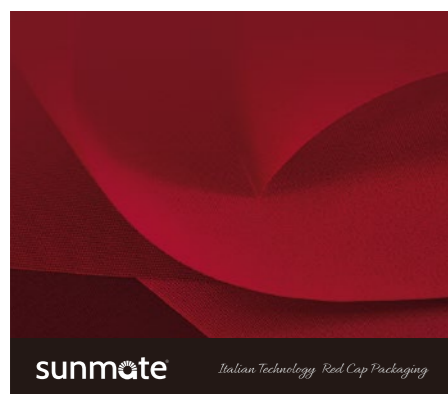

Shandong Yuma Sun-Shading Technology Co., Ltd. is a high-tech enterprise integrating the research and development, production, and sales of functional sun-shading materials. Its business covers a wide range of areas including indoor and outdoor shading fabrics, ready-made outdoor shading products, and related accessories.

The company's fabric product portfolio comprises five major categories — blackout fabrics, dimming fabrics, sunscreen fabrics, outdoor fabrics, and functional membrane materials — encompassing over a thousand product varieties.

Since its establishment in 1991, Yuma has adhered to its core strengths of innovation, lean manufacturing, and service depth. Dedicated to the continuous advancement of the sun-shading industry, Yuma has grown to become the largest shading fabric manufacturer in China, with its products exported to more than 70 countries and regions worldwide.

Main business

Internal and External Sun-shading Fabrics

Outdoor space products

1 Stable and Durable

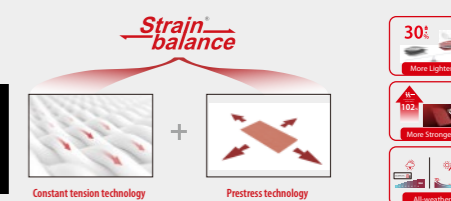

2 Multi-functionality

3 Distinctive Design

4 YUMA Tesla Outdoor-Specific Fabric

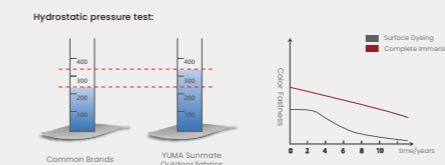

Zipper track roller blinds

High-end Design

- Full box closure design, elegant and beautiful.
- The angle of the folding arms can be adjusted arbitrarily, and the sunshade position can be adjusted as needed.
- The top-side integrated installation design is convenient and quick, and can adapt to different installation scenarios.

Lighter And Stronger

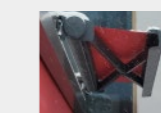

- It adopts the all-weather and high performance outdoor special fabric of YUMA Sunmate; High quality resistance to hydrostatic pressure, high quality self-cleaning and waterproof; More than 8 years of color fastness and service life.
- The all-aluminum tent body is designed with a large number of aluminum alloy extrusions and castings. Lighter weight, higher strength.
- Max Size 6000mm*3500mm. Large size, strong and sturdy.

Awning

Stable and Durable

- All-weather outdoor testing over 12000 times. Safe operation without failure, with a design life of over 30 years.
- The tube of the folding arms is thickened and the cross-section is more optimized, and the die-cast joint is integrally formed with a compact internal structure that is less prone to bending and more wind-resistant.
- Profiles and accessories are all coated with outdoor-specific powder coating to prevent corrosion and rust.
