

**Australia's Leading Supplier of
Window Furnishing and
Technical Textile Production Solutions**

T300 Gen 2

Our most universal welder, the T300 Flex uses hot air and/or hot wedge technologies for an array of seam types.

Seam Width 10 to 50mm (0.5 - 2")

Welding Cycle Up to 30M/min (100ft/min)*

Additional guides might be necessary.

** Depending on the application, the seam width and the type of material used.*

Triad Extreme

The Triad comes fully assembled and ready to weld stationary or traveling on a table top track, providing hands-free, single person operation from a floor or table surface. Perfect for a wide variety of coated and non-coated industrial textiles.

Seam Width 10 to 50mm (0.5 - 2")

Welding Cycle Approx. 10M/min

112 Extreme

The 112 Extreme high-performance welder is our fastest and most precise welder for long, straight seams.

This machine can handle fabric seals quickly and efficiently ultimately saving you time and money. The 112 Extreme can be custom built to suit any size length you need.

Seam Width: 6 to 50mm (0.5 - 2")

Welding Cycle: Up to 20M/min*

** Depending on the application, the seam width and the type of material used.*

**Streamline, Simplify and Automate.
Your Curtain Production Journey Starts Here**

AGA-2300 *Automatic Curtain Cutting*

If you're searching for the **most efficient cutting solution**, consider the **Eisenkolb AGA-2300** Automatic Curtain Cutting Machine. This machine **eliminates the need for skilled manual labour**, while streamlining your cutting process.

The Result?

Improved accuracy, reduced labour cost and consistent quality.

CCP-2300 *Automatic Curtain Hemming System*

The **Eisenkolb CCP-2300** is built with **space-efficient design** and smart features ideal for substantially increasing output while maintaining the highest quality finishes your customers expect. All while **dramatically removing the need for skilled operation**.

Proven to be 3-4 times faster than a conventional sewing machine for hemming.

MPS-2600 *Automatic Pleating & Microflex Hook Insertion System*

The **Eisenkolb MPS-2600** automatically **produces single and double pleats** with precise, repeatable results. Equipped with a Brother X-Y lockstitch unit, folding station and integrated Microflex hook feed system (with 5mm height adjustment and 100 hook capacity).

A built-in pleat calculation module allows easy setup of pleat depth and spacing, while laser alignment and needle cooling maintain accuracy on all fabrics.

Production Capacity: Up to 250 pleats per hour

Other Automation Solutions

Curtain Knife Pleating

Vari-O-Matic

Make a difficult process manageable for any operator. **Processing a knife pleat header** would generally require an extremely skilled operator.

With the **RIMAC PG343** or **Vari-O-Matic** automatic curtain knife pleating machines, you are guaranteed consistent and professional finishes with **minimal operator skill required.**

PG343

Australia's First Automation System for Automatic Roller Blind Bottom Hem Stitching

EM-RBH

The **EM-RBH** delivers **high-quality, professional hems with minimal operator skill required.**

Designed for speed, precision and ease of use the EM-RBH features an auto-pneumatic folding system for consistent hems (adjustable widths from 35mm to 50mm) and precise stitch margin for clean, pucker-free seams. **Choose between lockstitch or zig-zag configurations** to suit different applications for plain finish rollerblinds.

- + **Synchronised feeding system** for smooth, precise fabric flow.
- + **No skilled operator needed** Fully automatic trimming and backtacking.
- + **2.7M hem completed in just 50 seconds.**
- + **Built-in alignment guides** for perfectly straight seams.

Industrial Sewing Machines

EM

LU-2828V

The LU-2828V Series is a **semi-dry single needle, compound feed walking foot machine**.

The digital control panel displays all essential settings which can be easily adjusted by the touch of a button.

Standard functions include:

- Automatic foot lift
- Auto back tack
- Auto thread trimming

JUKI®

DDL-8000C

The all new Juki DDL-8000C **single needle, dry head, lockstitch machine** features a digital control panel allowing operators to take control over some manual machine settings.

Standard functions include:

- Auto thread trimming
- Auto presser foot lift,
- Auto back tack
- Condensed stitch function.

BSC-8BL

Seiko's BSC-8BL is a **single needle, high-speed narrow cylinder bed, walking foot machine**. It is designed to handle a variety of sewing applications from medium to heavy-weight fabrics : **leather, vinyl, synthetics, laminated and coated materials**.

The narrow cylinder bed design ensures easy maneuverability around tight curves and intricate details, ensuring flawless stitching every time.

Industrial Sewing Machines

EM

GLOBAL INDUSTRIAL SEWING MACHINES

UP-1646

Global's UP-1646 is a programmable ornamental stitching, double needle postbed machine designed to elevate decorative seams for upholstery, motor trimming, marine trimming and more.

Supplied with 72x standard patterns (18 single and 54 double needle) decorative stitch patterns and 35 free slots for programmable patterns.

JUKI®

2 models available in medium sewing area:

AMS-221EN-2516 (250mm x 160mm)

AMS-221EN-3020 (320mm x 200mm)

AMS-221EN

The Juki AMS-221EN programmable sewing machine can be used for free pattern stitching, panel sewing, reinforcement stitching, etc. Examples of applications include the attaching of labels, emblems and name labels, the attaching of Velcro, various shape-tacking and special bartacking.

The memory storage capacity is 500,000 stitches and 999 patterns (max. 50,000 stitches per pattern).

MO-6814S/DD10

The Juki MO-6814S/DD10 is an advanced 2-needle, 4-thread direct drive overlocker. Achieve maximum sewing speeds of up to 7000 stitches per minute. Suitable for a wide range of light to heavy-weight materials.

Cutting & Embroidery Machines

EM

High-Quality Italian Made Cutting Machines For A Variety Of Applications

BOBCUT

BOBCUT, the newest RASOR cutting machine is a **70mm battery powered, handheld cutter** that sets new standards!

SW-100

The SW-100 is a **6-edge, 100mm diameter knife** that can cut any kind of fabric up to 35mm in thickness.

NTK-100AH

The NTK-100AH is an **automatic tape cutting machine** for automatic cutting of webbing, velcro, rope and more.

- + **Dual Cutting Options:** Hot knife for heat-sealing synthetics; Cold blade for clean cuts on elastic, Velcro and more.
- + **Cutting Range:** Lengths from 10mm to 9999.9mm ; widths from 1mm to 100mm.
- + **Digital Control Panel:** allows for batch quantity input, with automatic stop when roll finishes.

SUMMIT

- + **16 Needles** : More flexibility.
- + **Automatic Thread Tension with Melcos's Acti-Feed** : Less tweaking, more embroidery.
- + **Small Lower Arm** : Easier to embroider areas like pockets and sleeves.
- + **NEW! 10.1" Full HD Touch Screen**
- + **NEW! Maintenance Reminders:** Step-by-step maintenance guide.
- + **And more.....**
