Manufactured in Newcastle

Why Aluminium Shutters?

Designed and Manufactured to suit the extremes of our climate

Crafted to perfection with clever patented design, Classic Plantation Shutters offer a range of Aluminium Shutters for both inside and outside the home. Our shutters are inherently stronger and more durable than market alternatives such as PVC or Timber offering unparalleled strength, durability and longevity.

Innovative patented frame and seal with unique concealed hinges and concealed catches offers sleek clean design with an unparalleled control of heat and light transfer. Aluminium is one of the best heat reflectors, combined with double skin extrusions our panels provide excellent insulation for both heat and cold.

Boasting an impressive 1455mm Blade Span with chip and scratch resistant finish, our shutters are ideal for any room or alfresco area being indestructible in wet areas, easy to clean and tough to break.

We manufacture our shutters in Newcastle and proudly use local powder coating specifically for Australian conditions. Powder coating is the longest lasting of all paint finishes available for Plantation Shutters providing peace of mind, maintenance free and easy to clean window covering and outdoor privacy options.

Core Features

- Uniquely Australian Designed and Manufactured
- Built to last – High Quality T6 Grade Aluminium with a minimum of 80 microns powder coat finish
- Custom Powder Coat options – Dulux, Interpon, Colorbond & DecoWood with local lead times
- Extra Wide individual panels spanning up to 1.5m maximizing views and streamlining the finish
- Security options available – our lockable shutters are tried and tested and are Australian Standards compliant.
- Fly Screen addition to the back of the panel allows the windows behind to be easily cleaned without fuss
- Superior Thermal Efficiency – thanks to our Eco Seal frame and tight blade closure
- Waterproof – Suitable for indoors/outdoors and wet areas
- Unique and Patented Design features including completely concealed hinges, catches, aluminium end caps and dual control handles
- 316 Stainless Steel component options or 304 as standard

Shift workers, new parents, light sleepers: this one's for you.
