

Building a Greener Future

Welcome to Ozroll

At Ozroll, we are committed to providing innovative, sustainable solutions for the building industry.

Our dedication to quality, efficiency, and environmental responsibility is reflected in our diverse range of products. We are excited to introduce you to our offerings and highlight our recent advancements in sustainability, including our involvement in the WincovER initiative and our use of Local Green aluminium.

Industry Recognition

Peter Bulka, Capral's Industrial Manager for Southeast Queensland, commends our move, highlighting that Capral's LocAL Green aluminium empowers manufacturers to make responsible procurement decisions and significantly contribute to a greener future.

Elipso Louvres

Sustainability with LocAL Green Aluminium

Reducing Carbon Footprint with LocAL Green Aluminium

Ozroll is proud to announce our switch to LocAL[®] Green lower carbon aluminium for our Elipso Aluminium Louvres. This change is a significant step towards minimizing our carbon emissions and fostering a greener planet.

Wind tested suitable for all Australian States and Territory.

Fire tested. Meets the provision of BCA 2022 clause C210 (5)(d) Class 2-9 buildings.

Key Benefits:

- **Environmentally Responsible:** LocAL Green aluminium reduces CO2 emissions by up to 50% compared to the global average.
- **High-Quality Performance:** Maintains structural and performance characteristics with lower CO2 emissions.
- **Energy Efficiency:** Designed to maximize energy efficiency, reducing the need for artificial heating and cooling.
- **Proudly Australian:** Locally sourced, supporting the Australian economy and reducing transportation-related carbon footprint.

Local Production

Elipso Australian Louvres and Screens have been designed, manufactured and produced in Queensland since 1975. Australia's Leading Suppliers of Aluminium Louvres and Screens. All of the products in our range have been engineered in Australia and are backed with a Product Guarantee.

WincovER Initiative

Empowering Energy Efficiency

Ozroll is thrilled to be actively involved in the WincoverER initiative, which measures and promotes the energy efficiency of window coverings.

This program aligns perfectly with our commitment to sustainability and our dedication to empowering homeowners to make informed choices.

Our Commitment to Energy Efficiency:

- **Comprehensive Testing:** Our products, including Inspire Plantation Shutters, Roller Shutters, and Aluminium Louvres, have been tested to meet the stringent requirements of the WincoverER program.
- **Energy Performance Ratings:** We provide detailed ratings, such as solar heat gain coefficient (SHGC) and U ratings, to help homeowners assess the efficiency of our products.

Slidetrack Outdoor Blinds

Elevate Your Projects with Slidetrack Outdoor Blinds

Slidetrack[®]

Slidetrack[®]

Environmentally responsible shading solution.

For architects and project managers, Slidetrack Outdoor Blinds offer a robust solution to managing heat, light, and privacy in large outdoor areas.

Whether you're dealing with strong winds or the need for seamless integration with existing structures, Slidetrack's precision-engineered components ensure durability and performance.

Key Benefits:

- **Custom Fit:** Tailor-made to suit specific project needs, ensuring quality and consistency.
- **Heat and Light Control:** A wide range of fabric options, including PVC with up to a 10-year warranty, helps control heat ingress and light, making them ideal for large outdoor areas.
- **Durable and Reliable:** Marine-grade stainless steel fixings and 100% Australian extruded aluminium, locally sourced and manufactured, guarantee longevity, even in coastal environments.
- **Versatile Operation:** Available in solar, battery, 240V, or manual options, suitable for various project requirements.
- **Fast Turnaround:** Blinds made and dispatched within 2-5 days for standard colors, minimizing project delays.

Local Production

Slidetrack Outdoor Blinds are custom-made in Adelaide to suit each individual requirement, providing quality and consistency with each job. By choosing Slidetrack Outdoor Blinds, you ensure your projects are equipped with reliable, aesthetically pleasing, and environmentally responsible shading solutions. Enhance your designs and deliver superior performance with Ozroll's commitment to excellence.

Inspire Plantation Shutters

Redefining Energy Efficiency

INSPIRE

INSPIRE

A Green and Energy-Efficient Window Treatment

Plantation shutters represent one of the most energy-efficient types of window covering on the market.

Inspire Plantation Shutters are designed to enhance the visual appeal of homes while delivering significant energy-saving benefits. All of our plantation shutters have been accredited by the Wincover star rating programme.

Key Benefits:

- **Summer Energy Savings:** Reduces solar heat gain by up to 68%, lowering the reliance on air conditioning systems and reducing energy consumption.
- **Winter Insulation:** Reduces heat loss by up to 24%, retaining warmth and minimising the need for excessive heating.
- **Solar Heat Gain Coefficient (SHGC):** Measures the ability to block heat gain from the sun, leading to cooler living spaces in summer.
- **U Ratings:** Represents thermal insulation performance, ensuring minimal heat transfer and reducing heating needs in winter.

Local Production

Inspire Plantation Shutters by Ozroll offer a traditional look, with the highest quality components, reinforced with aluminium, are produced in industry best lead times. Each panel is custom built in Staplyton, QLD. Manufactured using scratch-resistant paint, these Poly-composite shutters are fire retardant, water resistant, and help insulate up to 6 times better than timber or polyresin shutters.

Rollashield Roller Shutters

Superior Security and Style

Rollashield[®]

Rollashield®

Unparalleled quality and performance

When managing large windows or areas prone to excessive heat, Rollashield Roller Shutters provide an effective solution to enhance energy efficiency and security.

These shutters are designed to meet the demands of modern architecture while ensuring quick and efficient installation.

Key Benefits:

- **Energy Efficiency:** Proven to reduce energy consumption by up to 74% in summer, making them ideal for projects focused on sustainability.
- **Superior Quality:** Manufactured with high-grade, 100% Australian extruded aluminium, locally sourced and roll-formed for precision, ensuring durability and a precise fit that meets the highest standards.
- **Quick Delivery:** Fastest turnaround time in the country, with standard shutters dispatched within 48 hours, helping keep projects on track.
- **Australian Made:** 100% Australian family-owned business with a strong local workforce, ensuring quality control and reliable support.

Local Production

Rollashield Roller Shutters meet the highest standards, providing reliable and innovative solutions for various applications. For architects, project managers, and builders looking to enhance security, energy efficiency, and aesthetic appeal. Rollashield Roller Shutters offer unparalleled quality and performance and are designed and manufactured in Australia to ensure faster, more reliable delivery in as little as 7 days.

Join Us in Building a Greener Future

Ozroll is dedicated to creating sustainable, energy-efficient solutions for the built environment. By choosing our products, you are not only investing in superior quality but also supporting a greener, more sustainable future.

We invite you to explore our range of products and discover how our commitment to sustainability can enhance your next project. Together, we can create beautiful, functional, and environmentally responsible spaces.

For more information, visit our website or contact us directly. Let's work together to make your architectural visions a reality with Ozroll.
