Thoracic Rare Cancers Symposium (THORACS)

Call for Sponsors

The Ottawa Hospital and the University of Ottawa are proud to offer the inaugural Thoracic Rare Cancers Symposium (THORACS), to take place at the National Arts Centre, Ottawa on Friday, October 3, 2025.

This one day Symposium, preceded by a dinner on the Thursday evening, has been designed to provide thoracic cancer specialists a unique opportunity to come together and discuss the current state of diagnosis and management of rare thoracic cancers. With the advance of molecular diagnostics, an increasing number of rare lung cancers are being identified (e.g. Her2, SMARCA4, NTRK, NRG1, EGFR exon20 etc) in addition to the more widely studied variants (e.g. EGFR, ALK, Ret etc).

Through lectures, case-based discussions and workshops, participants will be able to understand novel diagnostic and therapeutic options for these rare cancers. Put together by an outstanding organizing committee including leading experts from across Canada and the USA, this symposium promises to be an annual 'must do' event in the educational calendar for thoracic cancers.

Event sponsorship provides institutions and organizations with high visibility and interaction with participants in an intimate setting. Funding provided assists in the development of an engaging and exciting event for all participants.

Planning Committee: Dr. Paul Wheatley-Price (co-chair), Dr. Scott Laurie (co-chair), Dr. Unice Chang (fellows chair), Dr. Natasha Leighl (Toronto), Dr. Janessa Laskin (Vancouver), Dr. Brandon Sheffield (Brampton), Dr. Pasi Janne (Boston) and Dr Ross Camidge (Colorado)
