OneEducation

Enterprise software for educational institutions

technology**one**

"Moving to TechnologyOne's enterprise SaaS has given us a more robust platform, and allowed us to deliver a cloud-first, mobile-first experience."

LA TROBE UNIVERSITY

Transforming Business, Making Life Simple.

TechnologyOne's enterprise software empowers 1.4 million students across 118 campuses worldwide.

OneEducation underpins the operational, strategic and educational requirements of tertiary institutions with a single, integrated enterprise solution.

Leveraging our 30-year experience of working with leading universities, TAFEs, colleges and polytechnics across Australia, New Zealand and the UK, our enterprise solution will enable your institution to simplify your technology stack and drive efficiencies.

Research Management

Student Self-Service & Administration
(Available for tertiary institutions only)

Manage the entire student lifecycle through a solution that meets the unique needs of tertiary educators.

- Oversee enrolment to alumni student lifecycle

- Centralise all contact data and interactions

- Deliver real-time online self-service for students, agents, teachers and professional staff

- Immediately process information, queries and payments

- Design, develop and approve academic and training programs and curriculum proposals

- Provide faster service responses and efficient workflow

- Enable seamless integration with timetabling, learning management systems and library services

---

Recruitment, Engagement & Admissions
(Available for tertiary institutions only)

Create a connection with prospective students from the outset.

- Empower students to manage their own application through self-service

- Engage with prospective students via social media and online enquiry

- Easily collect operational and assessment data from intelligent web forms

- Monitor workflow for enquiries and application assessment

- Streamline business processes through rules-based configuration

- Maximise revenue through an engaging admissions system that meets the shifting expectations of students

Finance & Procurement

Simplify the capture and retrieval of financial information through flexible chart of accounts, ledger and reporting capabilities.

- Use precise figures on operating costs to accurately forecast revenue and expenditure

- Deliver integrated enterprise budgeting across departments

- Automate billing processes and recurring charge transactions

- Manage foreign currency interactions with centralised controls around exchange rates

- Improve expenditure transparency by consolidating all procurement and expense activity in a central system

- Eliminate paper-based processes by exchanging electronic data with suppliers

- Comply with local statutory, audit, international financial reporting standards (IFRS) and other regulatory requirements

- Minimise peaks and troughs in Profit & Loss through automated recognition of pre-payments and deferred revenue

- Enforce policies and automate day-to-day tasks with embedded workflows

- Simplify ordering and replenishment through contract management

- Prevent budget overruns with an accurate and real-time view of committed and actual expenditure

Business Intelligence

Consolidate institutional data into relevant, timely and accurate information to make sound business decisions.

- View business-critical information for all managers and departments

- Accurately report key student, financial and human resource data

- Gain total visibility over day-to-day operations

- Monitor performance towards strategic and operational KPIs

Human Resources & Payroll

Manage the entire employee lifecycle from recruitment through development and OHS, to payroll and transition.

- Deliver employee self-service functionality for leave, timesheets and personal details

- Manage talent, professional development and succession planning

- Simplify the recruitment process with full lifecycle workflow

- Analyse and manage workplace safety

- Standardise and automate common processes

- Provide comprehensive payroll functionality

Property and Campus Services

**Effectively manage your asset base to improve stakeholder satisfaction and institutional performance.**

- Track asset management submissions, requests and lodgements
- Access spatial analysis of property-related data
- Enhance user experiences with online self-service functionality
- Gain visibility of resources and assigned work requests
- Access, analyse and report real-time information

- Effectively manage capital works projects and job costing
- Manage expenditure based on asset condition and risk
- Improve forecasting of materials and workforce needs
- Satisfy regulatory compliance demands

Document Management

Overcome the challenge of managing vast amounts of business documentation with centralised content management.

- Store all business documents in a single, central repository
- Access information from anywhere, on any device
- Reduce information processing costs
- Reduce time spent searching for documents and records

- Capture, share and manage enterprise information including content from traditional letters and documents, from tweets, photos, audio, video, emails and more
- Adhere to all legislative compliance

Research Management

(Available for tertiary institutions only)

Effectively administer research projects from inception to completion using a single, integrated software solution.

- Centralise all project information including contacts, correspondence and proposals

- Manage contracts in a single record set

- Link multiple funding contributions and third party dispersals

- Track Intellectual Property registration

- Link all project revenue and opportunities related to a proposal

About TechnologyOne

TechnologyOne (ASX:TNE) is Australia's largest enterprise Software as a Service (SaaS) company and one of Australia's top 200 ASX-listed companies, with offices across six countries. Our enterprise SaaS solution transforms business and makes life simple for our customers by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,200 leading corporations, government departments and statutory authorities are powered by our software.

Our global SaaS solution provides deep functionality for the markets we serve: local government, government, education, health and community services, asset intensive industries and financial services. For these markets we invest significant funds each year in R&D. We also take complete responsibility to market, sell, implement, support and run our solutions for our customers, which reduce time, cost and risk.

For over 30 years, we have been providing our customers with enterprise software that evolves and adapts to new and emerging technologies, allowing our customers to focus on their business and not technology.
