

**SPEAKER PROFILE**

**Teja Malladi**

.....  
**Director**  
**Mapsolve AI Private Limited**

Teja Malladi is a GIS and spatial analytics specialist with over 13 years of experience leading geospatial research, infrastructure mapping, disaster risk assessment, and urban analytics projects. He holds an MSc in Geo-information Sciences and Earth Observation from the University of Twente (ITC), Netherlands. His work spans large-scale multilateral, bilateral, and government projects with organisations including the World Bank, Asian Development Bank, UNICEF, GIZ, UNDP, ILO, Rockefeller Foundation, and Government of India and multiple state governments in India.

He has led spatial analytics for projects involving statewide and national-scale datasets, including India's 1.5 million schools database, economic geography studies for Chennai Metropolitan Area, and resilience assessments across multiple Indian cities. Over the past decade, he has trained more than 750 government officials across India in geospatial analytics, risk-informed planning, and spatial decision-support systems.
