

Case Snapshot - NEPAL

From a broad long list to a focused set of priority investments

Agriculture remains central to Nepal's food security, rural livelihoods, and broader economic resilience.

Increased exposure to climate shocks poses a serious threat to food security and sustainable growth in Nepal.

A number of policy frameworks on climate adaptation in place but cohesive national action remains a challenge.

CA investment planning and prioritizing the investment opportunities yet to be institutionalized

PRIORITIZATION FUNNEL

> 60 investment alternatives from 9 sectors

Screening: Aligned with 5-year plan, Madhesh 2nd Periodic Plan & Agricultural Master Plan
