SPEAKER PROFILE

Justin Cross

Port Strategy, Planning, & Development Consultant Haskoning

Justin Cross is a maritime consultant with over 20 years of international experience. Whilst Vietnam has been home for the past 8 years, he has previously lived and worked in South Africa, the Netherlands, Brazil, and Australia.

The first 10 years in maritime consultancy work involved designing coastal protection works, dynamic mooring analysis studies, port planning, and discrete event modelling for logistics studies. The next 10+ years saw him focusing on what has now become his area of specialization: supporting clients with port development strategy, port and terminal planning, greening and decarbonizing of ports, and delivering technical due diligence studies.

Justin is also the Chairman of PIANC Working Group 240, which has been tasked with developing the guideline 'Guidance for Ports in Small Island Countries'.
