SPEAKER PROFILE

ByeongJo (Jo) Kong

Digital Technology Specialist
Asian Development Bank

ByeongJo (Jo) Kong is responsible for supporting the development and implementation of ADB-wide data analytics and big data programs, as well as assisting DMC governments in implementing data analytics and big data initiatives in development projects. Prior to joining ADB, Jo worked as a Machine Learning Engineer for AI startups in the US and Republic of Korea, and as a research member at MIT Computer Science and AI Lab for over 3 years. He also worked for UN-APCICT/ESCAP for 8 years, supporting ICT capacity building initiatives in the Asia Pacific region. Jo holds a dual master's degree in Electrical Engineering and Computer Science (EECS) and Engineering Management from Massachusetts Institute of Technology (MIT), USA and a dual bachelor's degree in Computer Engineering and Global Management from Kyunghee University, Korea.
