15–19 March 2021

Keep your data secure with Wamasys

Meter reading — Invoicing — Payment collection — Reporting — Teamwork — Customer portal
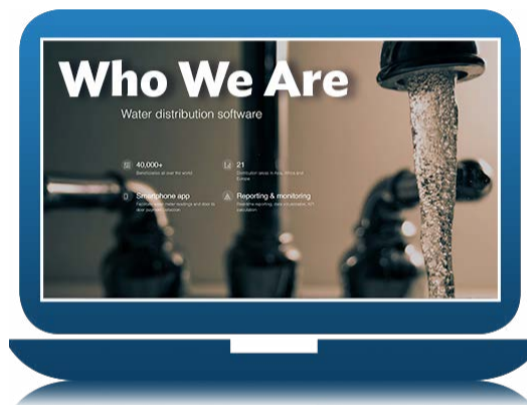

WATER DISTRIBUTION SOFTWARE

The Complete Solution to Manage your Water Distribution Activities, Improve Payment Collection and Decrease Nonrevenue Water

Name of Organization	**Wamasys**
Location	**Paris, France**
Year Registered	**2016**

Technology Profile

Wamasys is a software solution for operators to manage daily operations efficiently, from water meter reading to invoicing and reporting. It adapts to operators' needs and processes; and helps them save time, reduce error and fraud risk, and increase payment collection rate.

Wamasys' key features include:

(i) a smartphone application to strongly reduce meter reading errors and allow for on-the-field payment collection;

(ii) a wide range of invoicing and payment collection capabilities (including micro credits and payment arrears);

(iii) strong emphasis on reporting capabilities and alerts: real-time access to information on consumption, invoicing, and payment collection, shared from anywhere, any time; and

(iv) connects managers, meter readers, accountants, plumbers, and even customers in a single tool that is intuitive and easy-to-use, enabling a more efficient transmission of information and business optimization.

The right use of technology can be an asset for water operators to allocate resources more efficiently, enhance the quality of service, and increase number of beneficiaries and revenues, while offering quality service to customers. Smart meters and teamwork improvement services are also available.
