Catalyzing Innovations and Digitization for Safe, Sustainable, Resilient, and Inclusive Water Management

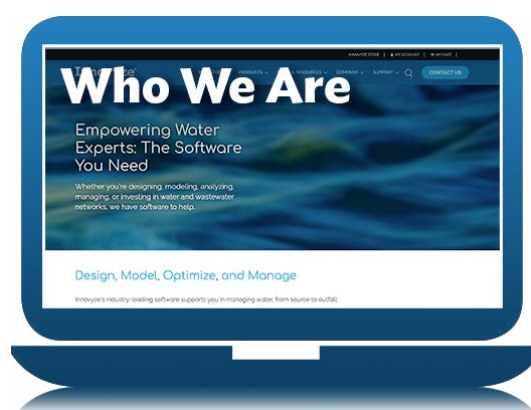

LAUNCH OF E-MARKETPLACE AND PUBLICATIONS

15-19 March 2021

Smart Water Solutions

Name of Organization	Innovyze
Location	United Kingdom
Year Registered	1974

Technology Profile

Innovyze is a global leader in building innovative, industry-leading software for the water industry for over 35 years, serving thousands of clients including the largest utilities, ENR design firms, consultancies, and refining plants around the world. With unparalleled global expertise, the Innovyze-connected portfolio of best-in-class solutions empowers thousands of engineers to competitively plan, design, and manage highly efficient and reliable infrastructure systems that provide an enduring platform for customer success.

Innovating for Customer Success

Our innovative solutions are used across by world-leading water engineering consultants. Users of our solutions benefit from integrated workflows and product features that have been built to quickly analyze and fill in the gaps for analyzing networks within challenging data environments, and as a Gold Partner Sponsor with ESRI, as well as other world-class technology providers, we collaborate to build best-in-class ArcGIS integration for all our solutions.

Artificial Intelligence and Operational Analytics

Intelligently Manage Processes in Real-Time

Artificial intelligence (AI) solutions offer the ability to be more responsive to real-time changes in process conditions, even to the point of predicting upcoming conditions and adapting control based on rapidly evolving data trends.

Our ground-breaking Emagin AI and machine learning (ML) solutions are

designed to predict and optimize water operations and processes for utilities and industrial facilities, accelerating the adoption of AI to transform the water industry.

Asset Management

Get the best from your assets Never sacrifice service reliability because of cost or unknown risks. With InfoAsset, you know exactly where to allocate your capital and operation and maintenance budgets to maximize the asset lifecycle.

Drainage Design and Analysis

Effective, Compliant Design for New and Retrofit Projects Innovyze drainage design and analysis solutions are used by designers, engineers, consultants, developers, reviewers, approving authorities, and water companies working on new and retrofit projects.

Stormwater, Sewer, and Flood Modelling

Innovyze provides the industry's largest global offering of stormwater, sewer network, and flood modelling solutions – designed to meet the needs of your project and organization.

Water Distribution Modelling and Management

Improve Your Network Performance

Innovyze's advanced hydraulic modelling software improves the performance and cost-effectiveness of water distribution networks, so water companies around the world can offer customers a better service.
