Deep-dive country discussions: Prioritizing adaptation investments across sectors

You have been placed into a specific sector group – see table to the right →

For your group, nominate one or two people to take notes on the flip chart and/or present at the end.

Each group has 40 minutes to discuss the below questions:

1

INVESTMENTS: What do you envisage as **long-term adaptation investments** for your countries that would transform your sector and their linked system/s so that they become climate resilient. **Describe the pathway of short-, medium- and long-term investments** you'd consider to get to this vision.

Don't forget to consider the important climate risks and long-term climate projections that are crucial – such as extreme heat – and if these also reach climate-vulnerable groups.

2

CHALLENGES / OPPORTUNITIES: What are the **potential challenges and opportunities** for identifying & implementing these investments? Do you already have **success stories & lessons** to share?

You may wish to consider tools, processes, policies, institutional coordination (among others), as well as utilizing different approaches and partners/platforms (eg. nature-based solutions, local adaptation, digitization, and incubating public-private partnerships).

Each group's nominated speaker will present their findings for 3 minutes.
