SPEAKER PROFILE

Tu Linh Tran

Green Port Consultant
Haskoning

Linh Tu Tran is a green port consultant with extensive experience in port planning and environmental feasibility assessments, with expertise in regulatory framework gap analysis and sustainable port development strategies. She has contributed to numerous cross-border projects and collaborated with diverse stakeholders across Japan, Africa, and Southeast Asia. In addition to her core port expertise, she specializes in renewable energy project planning and cost estimation. Her work focuses on applying sustainability standards, conducting material flow analysis, and improving energy efficiency to optimize port operations and support clients in achieving long-term port decarbonization and climate transition targets.
