SPEAKER PROFILE

Sonam Choden

Executive Engineer
Department of Surface Transport
Ministry of Infrastructure and Transport, Bhutan

Sonam Choden is an Executive Engineer at the Department of Surface Transport under the Ministry of Infrastructure and Transport, Bhutan, and among the few women engineers in the Department. With over 10 years' experience in road infrastructure planning, design, and project management, she specializes in geometric and pavement design, feasibility studies, Detailed Project Report preparation, cost estimation, and risk management. Sonam has contributed to key ADB-funded initiatives, including the Bhutan Highways Connectivity Master Plan, and currently leads the feasibility study and detailed design of the Lhamoizingkha-Sarpang Road project, driving sustainable and resilient transport development in Bhutan.
