SPEAKER PROFILE

Simone Schotte

Chief Operating Officer
FinnOC

Dr. Simone Schotte is Chief Operating Officer at Finnish Overseas Consultants (FinnOC) Ltd., where she supports international advisory assignments in transport infrastructure, climate resilience, environmental and social safeguards, and institutional strengthening. She holds a PhD in Economics and has over 15 years of experience spanning development research and international consulting. Her work includes socio-economic analyses, biodiversity and environmental safeguards-related assignments, data collection, database creation and management, indicator development and analysis, and government capacity building. At FinnOC, she has supported project delivery and business development across the Pacific, Africa, and Asia, including support to ADB-financed transport projects in Papua New Guinea and ongoing biodiversity and environmental safeguards support to the Infrastructure Implementation Unit in Liberia, among others. She has also published extensively in peer-reviewed journals and applied policy research, with a particular interest in translating analytical research into practical tools for policy and decision-making.
