SPEAKER PROFILE

Bram van Ooijen

Consultant

Bram van Ooijen is an urban transport consultant, working on the planning, design and implementation of sustainable urban transport projects and policies. His key expertise lies with active mobility/non-motorized transport and parking, but has all-round affinity with urban transport, including road planning & design, public transport, TOD, TDM and urban design. Formerly leading the Institute for Transportation and Development Policy (ITDP) China's Non-motorized Transport and Traffic Demand Management Divisions, Bram has 20 years of experience in the field. While trained in Dutch best practice at Twente University, he has extensive experience in developing countries, predominantly in Asia and the Pacific. Based in Guangzhou, China for 16 years, he works with multi-lateral development banks (World Bank and Asian Development Bank), international development agencies (United Nations, GIZ, FCDO), consultancies and NGOs around the world. Bram is also involved in advocacy, training, capacity building of stakeholders in the topics of sustainable urban transport. As an expert in the field, he is presenter, trainer and author of reports and articles for governments and multi-lateral development banks. He has worked in 30+ Chinese cities in 11 provinces in all corners of China, as well as 35+ cities around the world. Bram graduated from Twente University with a Master of Science in Civil Engineering & Management, specializing in Transportation.
