

Richard Hill

**Executive Advisor – Logistics
and Infrastructure Policy**
GHD, Advisory

Richard is an Executive Advisor / Technical Director in GHD's Advisory business who is based in Geelong, Victoria. Richard contributes to GHD's transport, port, maritime & coastal service lines and has over 28 years professional experience in this field. He works with government, private, and international funding agency clients. He has extensive experience in the field of waterborne transport infrastructure, working individually and within teams across APAC. Core experience areas include port and terminal planning, Ro-pax, maritime engineering, environmental impact assessment, financial and economic assessments, and project management.

Richard is currently engaged in strategic planning studies associated with port infrastructure in Australia, New Zealand, and in several Pacific Island States. Richard has extensive experience in preparing port master plans for multi-purpose ports, cruise terminals, Ro-pax, ship and boat maintenance facilities, fishing ports, marinas, and waterfront development. Richard also has experience in the design of quay structures, dolphins, breakwaters, quay walls, revetment systems, reclamation, dredging, boat lift facilities, and slipways. Richard is also a Board member of Committee for Geelong, a former board member of the Australian Section of PIANC and has been a specialist business advisor to UKTI in Ports in the UK. He is a member of PIANC WG240 that is preparing design guidelines for ports in small Island states.
