SPEAKER PROFILE

Aaron Salang

Data Analyst
Asian Transport Observatory

Aaron Michael Salang is a Filipino transport researcher and registered civil engineer specializing in transport planning, urban planning, traffic simulation, logistics, and port studies. He is a Data Analyst for the ADB-AIIB Asian Transport Observatory. His work supports regional data systems, policy briefs, country profiles, and research for sustainable, inclusive, and resilient transport. He holds a Master of Engineering in Maritime Technology and Logistics from Tokyo University of Marine Science and Technology and a BS in Civil Engineering from the University of the Philippines. His research experience covers agent-based freight simulation, off-hour delivery policy evaluation, maritime incident analytics, crash reconstruction, low-carbon transport training, and traffic simulation. He has authored and presented peer-reviewed studies in transport, logistics, safety, and emissions forecasting.
