

## SPEAKER PROFILE

# Avinash Dubedi

**Program Head**  
**WRI, India**

Avinash Dubedi is Program Head, Transport with the Sustainable Cities and Transport program at WRI India. In this role, he leads research and implementation initiatives focused on transport data standardization, transport data analytics, and public transport electrification at the national and state levels. His work focuses on enabling evidence-based policymaking using data, analytics, and the adoption of Digital Public Infrastructure (DPI) approaches in mobility to build more efficient, integrated, and sustainable transport systems. Avinash has over 17 years of experience in transport modelling and planning, with expertise in transport data analytics and modelling, transport planning, public transport systems, and risk assessment for public-private partnership infrastructure projects. He has worked extensively with government agencies and city stakeholders to develop sustainable and data-driven mobility strategies. He holds a master's degree in civil engineering with a specialization in Transportation Engineering from Indian Institute of Technology Kanpur and a bachelor's degree in civil engineering from University of Mumbai.
