# Catalyzing Innovations and Digitization for Safe, Sustainable, Resilient, and Inclusive Water Management

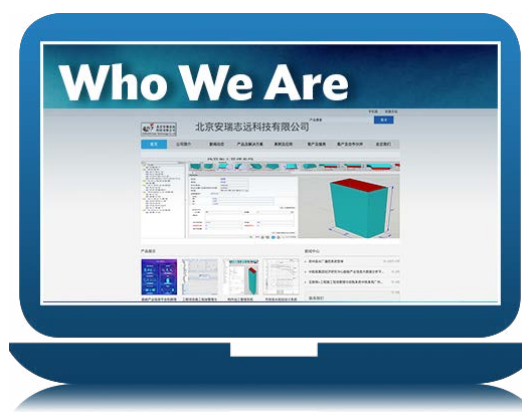

LAUNCH OF E-MARKETPLACE AND PUBLICATIONS

15-19 March 2021

## Smart and Digital Water

Name of Organization **Beijing Anrui Zhiyuan Technology Co.**  
 Location **People's Republic of China**  
 Year Registered **2008**

## Technology Profile

Beijing Anrui Zhiyuan Technology has successively developed a number of large-scale databases, data analysis, and decision support system projects over the years. These include project supply chain management (PSCM), project site construction management and control systems, municipal drainage planning and design systems, urban waterlogging and flood control simulation systems, urban climate change business systems, intelligent rainstorm analysis systems, and water supply pipeline network leak detection and positioning systems, among others.

The PSCM system, in particular, leads to successful outcomes at the project level and enterprise level management coordination of construction project management, thereby bringing more systematic and holistic solutions to construction enterprises.

At present, the company's software services have been applied in the Beijing Urban Planning Research Institute, China Railway Construction, China Railway, Beijing Climate Center, Guangdong Red Cross, China Shipbuilding Corporation, etc.
