Catalyzing Innovations and Digitization for Safe, Sustainable, Resilient, and Inclusive Water Management

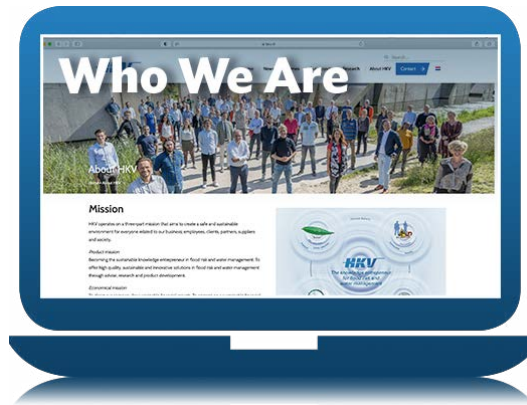

LAUNCH OF E-MARKETPLACE AND PUBLICATIONS

15-19 March 2021

HKV Digital Water

Name of Organization	HKV
Location	Netherlands
Year Registered	1995

Technology Profile

HKV is an independent company based in the Netherlands that provides consultancy services and research in water and safety. Established in 1995, HKV has quickly grown to a dynamic firm with a staff of 80 and 2 offices.

HKV is a knowledge entrepreneur in flood risk and water resources management

HKV's services are based on in-depth knowledge of hydrology, hydraulics, morphology, mathematics, remote sensing, artificial intelligence, and information technology. Scope of work covers aspects of smart water and safety including:

- flood forecasting, management, and control;

- early warning systems for flood, drought and precipitation;
- safety and flood risk analysis for regional and urban water systems;
- management of rivers and estuarine systems; and
- disaster management and evacuation plans.

HKV would love to participate in the exhibition to establish resonance and synergy with professionals and water colleagues from Asian Development Bank's developing member countries.
