

Climate-Resilient Financing for Bangladesh's Garment Supply Chains

A scalable financing programme for manufacturers and SME suppliers
in major industrial clusters

PEOPLE
PLANET
PROSPERITY

THE OPPORTUNITY

Finance flood protection and drainage, water security and recycling, heat-resilient workplaces, resilient equipment and supply-chain infrastructure.

INDICATIVE PROGRAMME SCALE

USD 100 million
initial programme

50–100
Garment manufacturers
and SME suppliers

Preliminary and subject to pipeline assessment

FINANCING APPROACH

- Commercial bank lending
- Low-cost MDB and DFI loans
- Guarantees and risk sharing
- Technical assistance
- Insurance and risk transfer

EXPECTED BENEFITS

- Reduced production losses
- Stronger business continuity
- Safer, heat-resilient workplaces
- More resilient export supply chains
- Protected jobs and livelihoods

POTENTIAL LEAD & PARTNERS

Potential lead: BRAC Bank
Partners: Manufacturers • Banks • Technology and engineering firms • Insurers • MDBs and DFIs • Technical partners

KEY BARRIERS

- Limited project-level climate-risk data
- Difficulty quantifying avoided losses
- Limited SME technical capacity
- Lack of long-tenor and risk-sharing instruments

THE ROUNDTABLE QUESTION

How can banks, MDBs and DFIs, insurers and technical partners make resilience investments commercially bankable and scalable—particularly for SMEs?
