

**TITLE (20 words maximum)**

Building a Cloud Campus in Indonesia

**ABSTRACT CONTENT (300 words)**

Many of you are thinking, *“Cloud Campus, that’s just another buzz word, I have heard it all before”*. You know what, we have heard ‘Cloud Campus’ being used by ICT vendors to promote their cloud services as well. This is not that, it is the story of what it means to CQUniversity. In January 2020, CQUniversity established its first international campus. Technically this was not an easy undertaking for a project team to embark on, sure we build and expand campuses across Australia – that is easy. However, this is Indonesia, a foreign country with different supply chains, available technology, regulations, and cultures to understand and manage. This is the story of how CQUniversity built a cloud campus and then turned it into a real campus over 5,000kms away without being onsite until go-live.
